NEW COURSE FROM THE AMERICAN HEART ASSOCIATION!

BLOODBORNE PATHOGEN COURSE MATERIALS

In only about an hour, you can use the affordable Bloodborne Pathogen ourse materials to teach workers and community members what they need to know about bloodborne pathogens! See page 17.

HEARTSAVER® CPR & AED PART 1

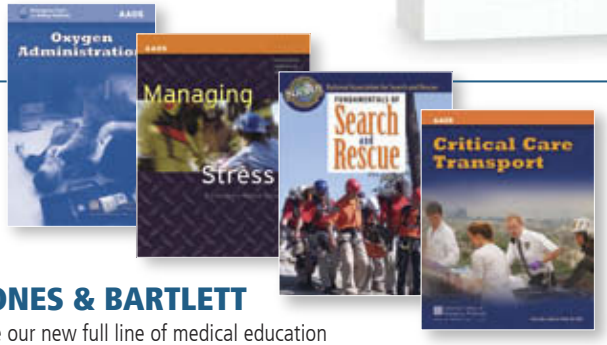
This part 1 includes a series of modules on CPR, AED use, relief of choking in adults and children, and optional infant CPR and relief of choking. See page 8.

ACUTE STROKE ONLINE

This course provides training on symptoms, diagnosis, and management of ischemic and hemorrhagic stroke and complications of stroke. See page 8.

HEARTSTATION TRIM SERIES AED CABINET

This secure, easily identifiable cabinet allows you to place your AED in a public place for easy access for only $199! See page 50.



JONES & BARTLETT

See our new full line of medical education materials for markets such as healthcare, EMTs, paramedics, and more! See pages 52-57.

INSTRUCTOR BAG PACKAGE!

Now have all of the training equipment you need for CPR & AED training! Packaged in a rolling bag is an AED trainer, an adult/child manikin, knee mats, and your choice of barrier devices for under $275! See more on page 9.

AHA ROLLING BACKPACKS

This black canvas rolling backpack with the Instructor logo and/or AHA logo has multiple compartments that hold most laptop computers, briefcases, and other business tools comfortably. Detachable accessory bags hold cords and other laptop accessories. The bag can be rolled like luggage or worn on the back and comes with wheel covers to protect the back against unsightly dirt when converting from luggage bag to backpack.

#80-1644 w/AHA logo

NEW TRAINERS NOW AVAILABLE!

HEARTSINE SAMARITAN AED UNIT & TRAINER

The SAMARITAN® PAD Public Access Defibrillator is different from any other public access defibrillator on the market. Designed specifically for public access use, It offers: ease-of-use, reliability & durability - with a 7 year unit warranty, IP56 certification - all at an inexpensive price. See the trainer or live unit on page 48.

VITALSIM LINE FROM LAERDAL!

Laerdal® helping save lives

When connected to VitalSim-enabled manikins, the VitalSim simulates ECGs, heart tones, fetal heart sounds, breath sounds, bowel sounds, blood pressure, and more! The instructor can also run pre-programmed scenarios as well as write their own custom scenarios! See page 61.

LIFE/form PORTABLE TRAINERS

These trainers are inexpensive enough so that each student can have their own hand or arm to practice technique and skills required in their courses. Under normal use, hundreds of injections may be performed for only $169 each! See the trainer on page 71.

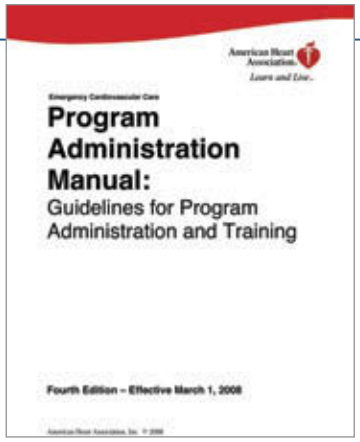
ADMINISTRATIVE RESOURCES & QUALITY ASSURANCE

AHA CORE INSTRUCTOR COURSE

Provides a foundation for teaching and facilitating regardless of an instructor candidate's area of specialization. For optimal flexibility, the course can be delivered in 3 ways: self-directed learning online; self-directed learning via CD-ROM; or in a classroom setting. Continuing education credit is available to those who take the course online.

#80-1050 Includes workbook and CD.
Requires AHA promo code or TC security code

#80-1035 Faculty Guide
Requires AHA security code



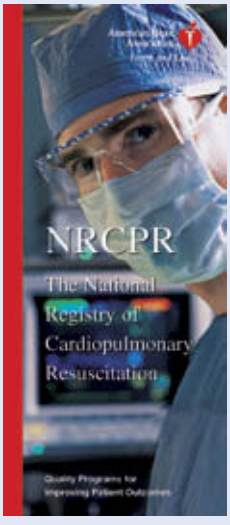
PROGRAM ADMINISTRATION MANUAL (4TH EDITION)

The Program Administration Manual has been revised to cover the Training Center (TC) administrative and course management details that must be followed by all levels of the Training Network, not just the TCs. This edition supersedes previous editions and training bulletins. The manual covers all aspects of program administration for the educational courses of the American Heart Association (AHA) Emergency Cardiovascular Care (ECC) programs.

The manual has been reorganized to eliminate redundancies where possible. The overall structure helps the reader understand how ECC programs are organized within the AHA.

New policies and changes to policies are communicated with Training Bulletins. Training Bulletins issued after the effective date of this manual supersede the related information in this manual. Training memos clarify current policies, introduce new educational materials and programs, and communicate changes to existing programs. The ECC Training Network will be informed of these changes through training bulletins and the AHA ECC Web site.

#80-1485



NATIONAL REGISTRY OF CARDIOPULMONARY RESUSCITATION

(with a new integrated Medical Emergency Team [MET] component)

Comparative data on in-hospital resuscitation events can help validate the success of your program – or suggest improvement. If you're committed to making your institution the best it can be, you need a benchmark. Participation in the NRCPR can be an integral part of your institution's effort to comply with JCAHO standards for monitoring performance in resuscitation events. This registry will provide data to assess resuscitation protocols, which can expand knowledge and improve life for all.

The new MET module measures and analyzes your Rapid Response Team events with NRCPR.

NRCPR ESSENTIALS

A software based data entry system composed of 11 research based data elements that allow a facility to compare their results with other facilities of similar size and type (adult/mixed/pediatric, etc).
Features include:

i. Provides performance graphs of key in-hospital resuscitation practice/patient outcome measures and suggests opportunities to promote and improve resuscitation safely within a facility.

ii. Allows members to follow critical resuscitation trends over time and compare their data.

iii. Includes current, evidenced based resuscitation performance guidelines using the 2005 AHA Guidelines for CPR & ECC.

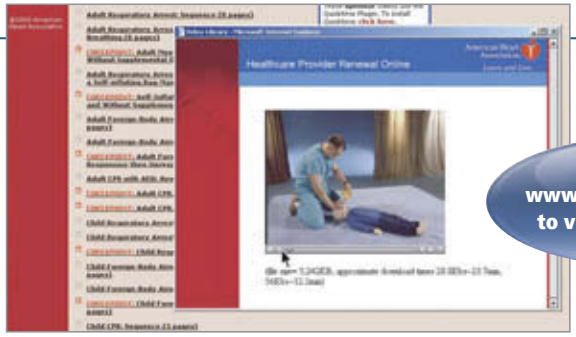
PART 1 LEARNING CONVENIENCE



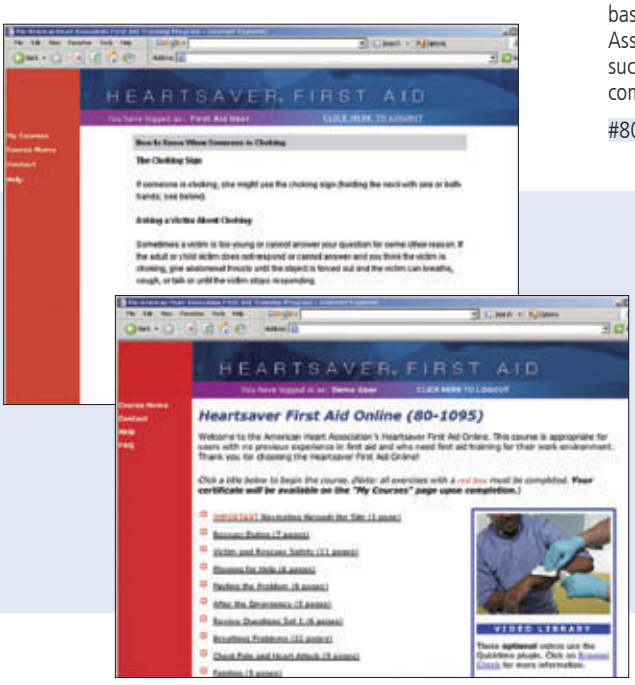
Visit www.eworldpoint.com to view a free demo.

Provides quick reviews after every checkpoint.

BLS HCP ONLINE PART 1

The Basic Life Support for Healthcare Provider Online Part 1 Course offers a flexible training option for busy healthcare professionals who would like to either renew their healthcare provider card or for the first-time user who would like to initially certify for CPR. The complete course is delivered in three parts. Part 1 delivers the cognitive learning through Web-based, self-paced modules. Parts 2 and 3 require students to meet with an American Heart Association Instructor to complete a hands-on skills practice session and a skills test. Upon successful completion of all three parts students receive their healthcare provider course completion card.

#80-1055 (each)



HEARTSAVER® FIRST AID W/CPR & AED PART 1

This web-based eLearning product, the Heartsaver® First Aid w/CPR & AED renewal course, provides the cognitive portion of the course online. There are two parts. Part 1 includes a series of modules that cover all required sequences for an American Heart Association (AHA) Heartsaver® First Aid with CPR & AED course. Participants also need to complete questions. Once part one is successfully accomplished, a certificate is received allowing them to take a skills test with a local AHA BLS or Heartsaver® Instructor. Part 2 is the hands on skills session with the instructor. When both parts are finished, a course completion card is issued to the student.

#80-1461

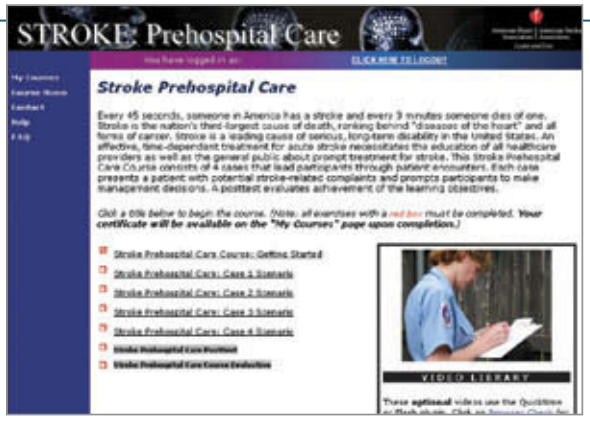
#80-1095 (First Aid only)

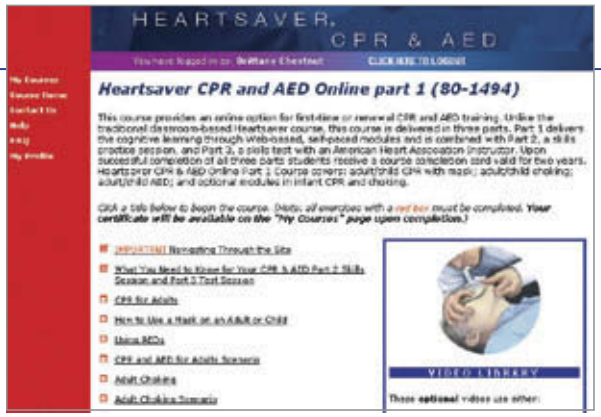
STROKE PREHOSPITAL CARE ONLINE

The Stroke Prehospital Care Online training module consists of four interactive cases that lead participants through patient encounters. Each case presents a patient with potential stroke-related complaints and prompts participants to make management decisions. In the scenarios, each patient's clinical status varies based on the timing and accuracy of participant answers. Each case ends with a summary of key points.

This module provides Continuing Education Accreditation for Emergency Medical Services. This continuing education activity is approved by the American Heart Association, an organization accredited by the Continuing Education Coordinating Board for Emergency Medical Services (CECBEMS), for 1.25 Advanced VEHs.

#80-1468





HEARTSAVER® CPR & AED PART 1

This complete course is delivered in three parts. Heartsaver® CPR & AED Online Part 1 is a Web-based eLearning product that provides the cognitive portion of the course online. This portion includes a series of modules on CPR, AED use, relief of choking in adults and children, and optional infant CPR and relief of choking. To help ensure students are to able to perform skills correctly a hands-on skills practice session (part 2) and a skills testing session (part 3) are required to complete the course.

Students who successfully complete Part 1 receive a certificate allowing them to enter a skills practice session and a skills testing session that they arrange with an AHA BLS or Heartsaver® Instructor. An AHA Heartsaver® AED course completion card will be issued when students successfully complete all three parts.

#80-1494

ACUTE STROKE ONLINE

This online course provides training on symptoms, diagnosis, and management of ischemic and hemorrhagic stroke and complications of stroke. The course content is:

- The stroke chain survival
- The 7 D's of stroke survival (detection, dispatch, delivery, door, data, decision, and drug administration)
- The definitions of ischemic and hemorrhagic stroke
- Pathophysiology
- Stroke risk factors
- Stroke recognition
- Stroke management
- Transition to critical care of rehabilitation

The CE/CEU credits are: 2.0 for nurses, 1.75 for paramedics, and up to 1.75 for physicians.

#80-1480

HEARTCODE™ ACLS CD

HeartCode™ ACLS CD is a product that uses eSimulation technology to present realistic patient scenarios for the ACLS cases. While interacting with the program, students assess each patient, formulate a treatment plan based on 2005 AHA Guidelines for CPR and ECC, and provide treatment. In addition, the team dynamics lesson and written test are required for completion of part 1.

ACLS EXPERIENCED PROVIDER INSTRUCTOR MANUAL

This three-hole punched text includes a course CD that includes 25 ACLS EP case presentations in PowerPoint. Designed in a case-based, group-interactive format, the manual focuses on resuscitation topics that provide a challenging and informative alternative to ACLS renewal. The instructor notes highlight the core objectives for each learning station and case, and define a theme or key concepts that evolve as the case progresses. Includes information on special resuscitation situations, toxicology, and bioterrorism. 125 pages. Content does not include the latest science.

#70-2294

ACLS RESOURCE TEXT FOR INSTRUCTORS & EXPERIENCED PROVIDERS

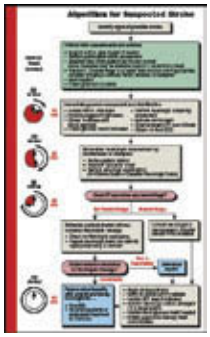
This text is intended to provide ACLS instructors with the material to further develop the understanding, skills, and depth of background knowledge that experienced providers are expected to possess. It has 2 sections:

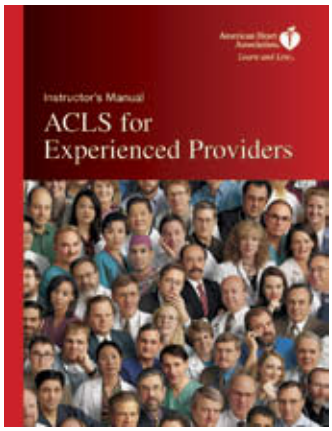
Section 1 expands on the information presented in the ACLS Provider Manual and gives rationale background information and supplementary data on basic ACLS core material.

Section 2 provides additional and advanced ACLS material to increase the provider's depth of understanding more complicated and special resuscitation situations.

Text is approximately 410 pages and is 8 1/2" x 11"

#80-1085





ALGORITHM FOR SUSPECTED STROKE AND PREHOSPITAL STROKE SCALE CARD

For fast reference by EMTs and other Healthcare Professionals, this fully illustrated card takes rescuers quickly through the Suspected Stroke Algorithm on one side, and the Cincinnati Prehospital Stroke Scale on the other.
4 1 x 2" x 6"; laminated for durability.

AIRWAY MANAGEMENT, ECG & PHARMACOLOGY

AIRWAY MANAGEMENT PACKAGE

The Airway Management Course includes five individual modules that can be taught together as a separate course or used to supplement a BLS for Healthcare Providers Course or an ACLS Course. Modules are designed for facilitator-led, small-group interaction using video and small-group skills testing stations. The modules include: Bag-Mask Ventilation and Airway Adjuncts, Laryngeal Mask Airway, Esophageal-Tracheal Combitube, and Endotracheal Tube and Impedance Threshold Device.

The package includes the Airway Management DVD (#80-1455), the Airway Management Student Guide (#80-1464), and the Airway Management Facilitator Manual, which includes lesson maps, a facilitator CD, binder, and an American Heart stopwatch. Course length is 4 hours if taught as a separate course.

#80-1466

AIRWAY MANAGEMENT VIDEO

The American Heart Association's adult Airway Management DVD includes the five individual modules. DVD length is approximately 70 minutes.

#80-1455 DVD

AIRWAY MANAGEMENT STUDENT GUIDE

The Airway Management Student Guide is designed for use by students before, during, and after the course as a resource. The guide contains critical skills action checklists and colorful illustrations of airway anatomy and airway skills. The modules cover basic adult airway skills therefore this course is not for students who require airway skills for surgical or advanced airway procedures.

#80-1464

ECG & PHARMACOLOGY INSTRUCTOR CD

The ECG & Pharmacology course presents information on basic electrophysiology, normal ECG measurements, basic arrhythmias, basic ACLS drugs, usage and routes of administration during cardiovascular emergencies, and how to integrate basic drug pharmacology into ACLS algorithms. It can be divided into two parts: one for ECG (course length 3.5 hours) and one for Pharmacology (course length 2.75 hours). These can be taught separately or together. The CD contains two modules of slide presentations; one for ECG and the other for Pharmacology, instructor notes, lesson maps, and administrative documents.

#80-1448

ECG & PHARMACOLOGY STUDENT WORKBOOK

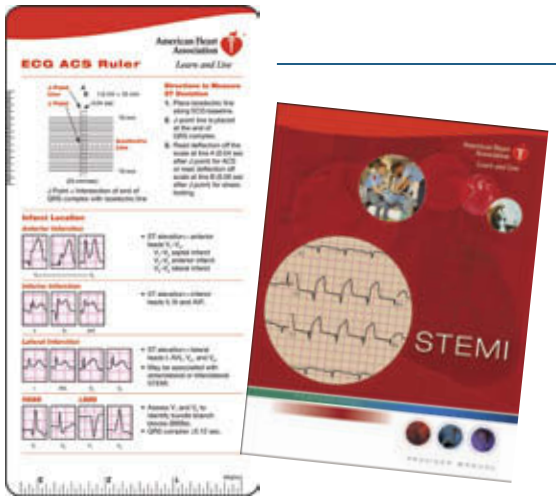
This student workbook is intended for student use before, during, and after the course as a resource. This course resource is intended for use in credentialed healthcare provider courses. 8 1/2" x 11", approximately 50 pages.

#80-1467

2008 ECC HANDBOOK FOR HEALTHCARE PROVIDERS

This spiral bound 2008 edition of the Handbook of Emergency Cardiovascular Care for Healthcare Providers is updated with the latest 2007 science updates for: Management of Patients With ST-Elevation Myocardial Infarction; Management of Patients With Unstable Angina/NSTEMI; Management of Patients With Chronic Stable Angina; Development of Systems of Care for STEMI Patients; and Early Management of Adults With Ischemic Stroke.

#80-1484



STEMI PROVIDER MANUAL WITH ECG RULER

The STEMI Provider Manual and the ECG (Electrocardiogram) ACS (Acute Coronary Syndromes) Ruler are key products to address the ongoing need to train emergency professionals in the early recognition of STEMI.

The STEMI Provider Manual is a self-study booklet that enables out-of-hospital and emergency department personnel to increase the assessment, diagnosis, treatment and survival rates for STEMI patients. The booklet also provides continuing education credit. The ECG ACS Ruler, which is also sold separately, is another tool created to aid out-of-hospital and emergency department personnel with reading, analysis and recognition of electrocardiograms.

#80-1499 Booklet
#80-1181 Ruler

CATASTROPHIC ILLNESS PRESENTING WITH COMMON CHIEF COMPLAINTS

An interactive, case-based module for small group training. Students review clues for the diagnosis of potentially catastrophic illnesses in children presenting with common chief complaints. Cases were chosen based on the lethality of the underlying condition, the ease of being misled by history and physical examination, and the ability to make the correct diagnosis with relatively simple interventions. Can be used either as a freestanding module or as part of the PALS course. Produced in partnership with the American Academy of Pediatrics.

#70-2285

PEDIATRIC STATUS EPILEPTICUS CD

Pediatric status epilepticus (SE) is a common emergency. This module helps students recognize the problem, appropriately assess SE, describe initial treatment and avoid overly aggressive therapies that the have potential for harm. The CD contains an instructor manual, student materials and three case studies. The video clips illustrate different types of seizures.

Designed for small group training; may be presented as an optional module of PALS course or as an independent offering. Produced in partnership with the American Academy of Pediatrics.

#70-2302

PEDIATRIC INTRAOSSEOUS ACCESS VIDEO (DVD)

Designed for use in the vascular access skills practice station of the PALS course, this video demonstrates how to establish intraosseous (IO) access in critically ill or injured children.

The detailed video presentation covers:

- Sites for IO infusion
- Indications for IO access
- Proper technique for placing an IO needle
- Appropriate immobilization
- Complications associated with IO access, and
- Removal of the device.

#70-2346

COPING WITH THE DEATH OF A CHILD (DVD)

These continuing education materials provide much-needed information to assist healthcare providers. Includes 8-1/2" x 11" booklet with this14-minute DVD. Counts as 1.25 hours of CME credit.

HEARTSAVER® BLOODBORNE PATHOGENS NEW

This course was designed for workers in the commercial market who must receive bloodborne pathogens training per the OSHA Standard 1910.1030. It is targeted toward settings such as industry and manufacturing, Fortune 1500 companies, occupational health, property management, hospitality, security, and health and fitness staff.

HEARTSAVER® BLOODBORNE PATHOGENS INSTRUCTOR MANUAL

The Heartsaver® BBP Instructor Manual provides information for teaching the classroom-based Heartsaver® Bloodborne Pathogens Course. This course covers the general OSHA Standard for bloodborne pathogens training for anyone with a reasonable chance for occupational exposure to bloodborne pathogens, but does not cover site-specific information. The manual includes Lesson Maps, and is packaged with two (one English & one Spanish) Heartsaver® Bloodborne Pathogens Poster. Also included is the Heartsaver® Bloodborne Pathogens DVD in both English and Spanish translations. The DVD contains a PowerPoint presentation designed to run continuously to simulate a video, with pauses for classroom activities/discussion needed to teach the course. This course is designed to meet OSHA requirements when paired with site-specific bloodborne pathogens training.

#80-1492

HEARTSAVER® BLOODBORNE PATHOGENS STUDENT WORKBOOK

The Heartsaver® BBP Student Workbook teaches students

- how to protect themselves from bloodborne pathogens in the workplace
- how to act when exposed to blood or blood-containing materials in the workplace
- how to use the right steps to clean themselves and the area when exposed to blood or blood-containing materials in the workplace
- how to report any exposure to blood or blood-containing materials in the workplace.

The student workbook covers the general OSHA Standard for first-time or renewal bloodborne pathogens training for anyone with a reasonable chance for occupational exposure to blood or blood-containing materials. A course completion card is included with the workbook. The Heartsaver® Bloodborne Pathogens Course is designed to meet OSHA requirements when paired with site-specific bloodborne pathogens training.

HEARTSAVER® BLOODBORNE PATHOGENS ONLINE

Through online content and interactive activities Heartsaver® Bloodborne Pathogens Online teaches students

- how to protect themselves from bloodborne pathogens in the workplace
- how to act when exposed to blood or blood-containing materials in the workplace
- how to use the right steps to clean themselves and the area when exposed to blood or blood-containing materials in the workplace
- how to report any exposure to blood or blood-containing materials in the workplace

The online course can be used for first-time or renewal bloodborne pathogens training and provides students with a certificate of completion when they have successfully completed all modules.

#80-1501

HEARTSAVER® BLOODBORNE PATHOGENS POSTER SET

This four-color, 16" X 21" poster describes and illustrates the basic steps for employees to reduce the chance of exposure to bloodborne pathogens in the workplace and how to protect themselves and others from being exposed to blood or blood-containing materials. Sold in sets of five; packaged unfolded.

#80-1416 VHS

PALS EMERGENCY CART CARD SET

Six two-sided cards that illustrate the algorithms and flowcharts used in the PALS course:

- Bradycardia with a Pulse
- Pediatric Tachycardia with Pulses and Poor Perfusion
- Pulseless Arrest
- Septic Shock
- Postarrest Treatment of Shock and Maintenance Fluid Requirements
- Pediatric Assessment
- Recognition of Respiratory Problems
- Management of Respiratory Emergencies
- Recognition of Shock
- Management of Shock

For crash carts or classroom. Durable plastic cards; 3-hole-punched; 8-1/2" x 11".

#80-1408 (6 pk)

PALS POCKET REFERENCE CARD

A quick reference for professionals who treat children. Features information on nine key PALS algorithms. Produced with the American Association of Critical-Care Nurses.

#80-1414

PALS TABLETOP FLIP CHART

A useful instructor tool designed for small group simulations. Features core case scenarios, algorithms and flowcharts. The front cues the student, with instructor scenarios on the back. 12 1/2" x 18". Printed on Yupo® stain- and tear-resistant paper.

#80-1435

PALS 12-POSTER SET

Illustrates PALS algorithms and flowcharts in a new, larger (22" x 34") format.

#80-1413 (12 pk)

PALS PEDIATRIC ASSESSMENT FLOWCHART POSTER (NOT SHOWN)

#80-1447 22" x 34" (each)

American Heart Association
Learn and Live

PEARS stands for Pediatric Emergency, Assessment, Recognition, and Stabilization. This course was developed because the Pediatric Subcommittee saw there was a need for an intermediate level course. Feedback from most of the Pediatric Subcommittee members and National Faculty who have taught PALS recognized PALS material is beyond the capability of some PALS students. This course is intended for healthcare providers who infrequently see critically ill children.

PEARS INSTRUCTORS PACKAGE

This is a pediatric course designed to enhance the healthcare provider's basic pediatric life support knowledge to prepare students to initiate and manage the first few minutes of a pediatric arrest or prevent the arrest of a pediatric victim in severe cardiopulmonary distress. It is a video-based, instructor-led, traditional classroom course.

This instructor package contains the PEARS Provider Manual (80-1417), the PEARS Instructor Manual (80-1418), the PEARS Poster Set (80-1477), a PEARS DVD (80-1419), and a stop watch.

#80-1478

PEARS INSTRUCTOR MANUAL

The manual includes detailed lesson "maps" or plans (~60 lesson maps), Scenario Cue Cards, and an instructor CD with pre-course and course materials to aid in conducting the PEARS Course. The manual is approximately 60 pages, shrink-wrapped, and 3-hole punched.

#80-1418

PEARS STUDENT MANUAL

The manual provides information on how to recognize the signs of impending respiratory failure or shock and know the appropriate treatment to initiate as well as follow recommended procedures for preventing disability and death in children. It is approximately 120 pages and includes a student CD and a PEARS pocket reference card. Upon successful completion of the course, students receive a course completion card.

#80-1417

PEARS VIDEO

The video depicts the cognitive and psychomotor skills of the PEARS Course and presents video clips to facilitate the group assessment discussions that precede the simulations for the core assessment, respiratory, and shock cases. Running time for the video is approximately 70 minutes. The video is closed-captioned.

#80-1419 DVD

PEARS POSTER SET

These posters are printed on durable paper in a new, larger size (22" x 34"). The six full-color posters are intended for use in the classroom. Each set contains one each of the Pediatric BLS algorithm; the Assess, Categorize, Decide, Act (ACDA) worksheet; and tables to assist in categorizing and managing respiratory emergencies and shock.

#80-1477

PEARS POCKET REFERENCE CARD

This folding, four-color, 4" x 6 1/2" pocket reference card contains information such as Vital Signs in Children, Assess-Categorize-Decide-Act (ACDA) worksheet, Summary of BLS ABCD Maneuvers, Management of Respiratory Emergencies, and the Management of Shock flowchart.

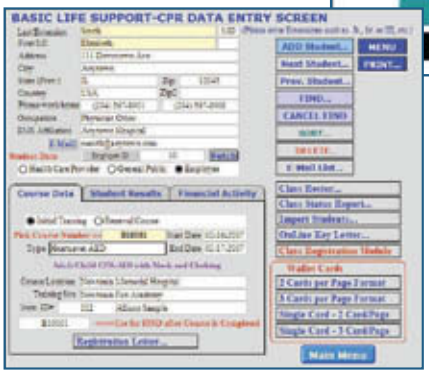
TRAINING CENTER MANAGEMENT SOFTWARE

WorldPoint One has become the premier data management software for training centers throughout the country – and now it's easier to use and more powerful than ever. It is still driven by the best-selling database program in the world: FileMaker Pro (Version 9.0). We've incorporated many of the latest improvements to bring you the most management power!

Our latest upgrade is both XP and Vista compliant, and improves and expands key features TC Mangers and Instructors alike have come to rely on. You can reduce paperwork, simplify registration, track inventory and loan-outs, and easily keep in contact with students and staff. Intuitive screens and quick setup means you'll be running in minutes – not days.



The new and improved features include:

- Expanded administrative control which includes the capability to restrict specific users access to only those parts of the program that they need to use.
- Marketing tools that make promoting your training center and your class offerings a snap!
- Streamlined screen layouts that include more information on one screen.
- Simplified menus for creating class schedules and reports.
- Expanded information that gives users quick access to more details – for example, checking payment status from student registration screen.
- 'Tool tips' that provide a pop-up description of screen icons.
- Customized reports, letters, and forms professionally formatted in PDF or Excel.
- Single-click function to email information (such as the contents of any field).
- Pull-down menus to quickly format levels, pone numbers and other data.
- Quality Assurance forms, with content for a specific program (ACLS, PALS, BLS, etc.), specific geographic area, etc.

Package includes: installation CDs, expanded User's Manual, and 90 days of free technical support.

A one-year technical support package is available for a nominal fee.

WorldPoint One is available as a stand alone, mini-network, or server edition. With the network and server capability, get access for more than one Instructor at a time.

Visit www.eworldpoint.com to view a free demo.

WORLDPOINT ROSTER TOOL

NEW

The Roster Tool gives the individual instructor or small training site the following capabilities to manage Emergency Cardiac Care student training records:

- Record instructors, including expiration dates for teaching credentials
- Record class information, including date, time, location, and instructors
- Record student information, including name, contact information, and class
- Track class registration
- Print list of all classes
- Print class sign-in sheets
- Print class rosters (front and back)
- Create additional course types
- Most importantly, electronically transmit class results via email to your sponsoring Training Center, improving card processing times and ensuring correct documentation.

#NRP-215

NRP INSTRUCTOR MANUAL (2006)

This three-ring binder contains the latest course content and features a new design, which makes course instruction easier. Includes an expanded instructor resource list, lecture points, and overview.

#NRP-202

NRP TEXTBOOK (5TH EDITION)

Includes six revised lessons, a new lesson covering special circumstances, complications and ethics, medication performance checklist, required megacode, review modules, and color photo section. Provides students with a complete self-study program, including scenarios covering each major resuscitation technique. Includes CD with video footage, interactive scenarios, and 3-D demonstrations.

#NRP-201

#NRP-203 Spanish

NRP WRITTEN EVALUATION PACKET (2006)

For instructors only. Reflects the latest, updated NRP content. Contains a convenient cross-reference table that works in conjunction with course textbook.

#NRP-206

#NRP-207 Spanish

NRP REFERENCE WALL CHART (2006)

This large, wall-sized flow chart easily takes a rescuer through the steps of neonatal resuscitation.

#NRP-208

NRP POCKET REFERENCE CARD (2006)

A convenient, durable, laminated pocket card (4" x 6") that offers a quick, complete guide to neonatal resuscitation procedures.

#NRP-209

#NRP-214 (10 pk)

NRP CODE REFERENCE CART CARD (2006)

An easy-to-follow flow chart card that walks rescuers through the steps of neonatal resuscitation. Perfect for emergency carts and quick reference.

#NRP-210

#NRP-213 (5 Pk)

NRP DVD ENGLISH/SPANISH (2006)

Improve training by adding video instruction to your classes. This DVD includes scenarios featured in the NRP textbook and depicts actual resuscitation and laryngoscopic film footage.

#NRP-211

NRP SLIDE PRESENTATION (2006)

- 160-slide set includes the latest content.
- Provides instructors with added visual interest for classes.

S.T.A.B.L.E. NEONATAL EDUCATION PROGRAM

This neonatal education program focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. S.T.A.B.L.E. stands for six key assessment parameters: sugar, temperature, airway, blood pressure, lab work, and emotional support for the family.

The S.T.A.B.L.E. program is designed for healthcare providers (pediatricians, family physicians, emergency professionals, respiratory therapists, neonatal nurses, administrators, and program directors) in all settings—from hospitals and birthing centers to emergency rooms.

S.T.A.B.L.E. INSTRUCTOR MANUAL (5TH EDITION)

Includes tips on how to set-up, testing and teaching the course, questions for practice session . Formatted with Learner Manual content on the right and Instructor content on the left. 200 pages.

#ST-0002

S.T.A.B.L.E. INSTRUCTOR COURSE SLIDES ON CD (5TH EDITION)

Includes more than 250 slides, plus 120 additional hyperlinked slides, presenting both the simple and more difficult concepts of neonatal stabilization. For self-study or instructor-led learning.

#ST-0003

#ST-0011 Spanish

S.T.A.B.L.E. LEARNER MANUAL (5TH EDITION)

For either self-study or instructor-led presentations. Fully reviewed by top neonatalists, nurses, and respiratory therapists. Illustrated; 220 pages.

#ST-0001

#ST-0010 Spanish

S.T.A.B.L.E. PHYSICAL EXAM/ GESTATIONAL AGE ASSESSMENT CD

160 color slides that provide an overview of a neonatal physical exam (from head to toe) and the Ballard gestational (22-43 week) age assessment (with photos).

#ST-0006

S.T.A.B.L.E. BLOOD GAS INTERPRETATION CHART (2ND EDITION)

#ST-0005

S.T.A.B.L.E. QUICK REFERENCE BEDSIDE CARD SET (3RD EDITION)

#ST-0004

CHALLENGING CASES IN PEDIATRIC INFECTIOUS DISEASES

Designed for pediatricians, family physicians, family practice program directors, residents, allied health professionals (such as nurse practitioners and physicians assistants), and other professionals who care for children.

A collection of 50 case reports that challenge clinicians and test their diagnostic skills. Questions about diagnosis, treatment, and management follow each case. Features color photos and radiographs for each case.

APLS COURSE MANUAL, 4TH ED.
(Updated CPR & ECC guidelines)

This revised 4th edition of APLS is the definitive pediatric emergency medicine resource from the American Academy of Pediatrics and American College of Emergency Physicians. APLS is a full-color teaching and learning system for physicians, students, residents, nurses, and APLS course directors and instructors. The flexible format allows each chapter to be used as a stand-alone module of education or a student resource in the APLS course format. Produced through collaboration between the AAP and the American College of Emergency Physicians.

TIPP® AND CONNECTED KIDS® INJURY AND VIOLENCE PREVENTION COUNSELING RESOURCES

The American Academy of Pediatrics has developed this child injury, safety, and violence prevention program specifically for healthcare and other professionals who work with children.

These two programs – the TIPP program, focused on injury prevention, and the Connected Kids program, which addresses violence prevention – provide professionals with safety sheets and surveys, handouts, questionnaires, and other educational resources (in English and Spanish) that promote awareness and action with minimal time and expense.

The materials are written for both patients and parents, and cover important topics such as bicycle safety, fire prevention, first aid, poison safety, water safety, anger and bullying, discipline, suicide and media violence.

This counseling and educational package CD includes over 60 handouts, designed to fit on 8 1/2" x 11" paper, with free online updates (a special access code is provided to users). Materials are grouped by topic and broken down by age (from infancy through age 12).

RED BOOK® RESOURCES FOR INFECTIOUS DISEASES IN CHILDREN

Created by the AAP Committee on Infectious Diseases and reviewed by the CDC and FDA–with contributions from hundreds of expert physicians–it is the clinical tool you will consult often and with complete confidence. The new 2009 edition has been thoroughly revised and updated to help you stay in step with the latest developments and recommendations.

Red Book® 2009 Product Highlights:

- All chapters and sections have been updated
- Key developments in combination vaccines
- 2009 AAP standards for child and adolescent immunization practices
- Revised recommendations on parental refusal to vaccinate
- The latest on prevention of mosquito-bourne infections
- Important new findings on drug interactions
- Revised American Heart Association recommendations for prevention of bacterial endocarditis
- Many new web sites included and bolded for easier access

PRESTAN PROFESSIONAL MANIKIN

Realistic to the eye and the touch, the Prestan manikin is unlike any other on the market. Available individually or in convenient multi-packs of four for class training purposes, this manikin is uniquely designed as a clamshell that accommodates an easy-to-insert face shield lung bag.

Prestan's revolutionary new CPR Rate Monitor allows for instant feedback to both instructor and student regarding the rate of chest compression. This allows each student to gauge their rate of compressions on their own as well as allowing the instructor to monitor several students quickly and easily.

And with the patented face/head tilt, the Prestan manikins simulates the way an actual victim's head would move if he required CPR. In addition, the unique construction of the manikins incorporates a mechanism to help them use the correct force to compress the chest to the correct depth.

Prestan Professional Adult/Child CPR/AED Training Manikin (with CPR monitor)

#PRO100
with 10 face-shield lung bags and a nylon carrying case

Prestan Professional Adult/Child CPR/AED Training Manikin (without CPR monitor)

#PRO100B

TRUMAN MULTI MANIKIN

The TruMan Multi manikin model has been designed and engineered to bring added realism to training in cardiopulmonary resuscitation (CPR) and simulation of defibrillation technique using an automated external defibrillator (AED). These features, combined with the unique AirSim airway management system, enable Truman to deliver a comprehensive and cost effective training experience.

Product Features include:

TruMan for Cardiopulmonary Resuscitation (CPR)

- Compression depth and effectiveness of ventilation are displayed and the student can modify behavior and identify optimal pressure to apply during compressions. The ideal rate of ventilation can also be determined.
- Rate of compression is output to the monitor display allowing real-time feedback on technique.

TruMan for Automatic External Defibrillator (AED) Training

- The built-in AED trainer simulates the approved AHA/ERC scenarios.
- Truman is designed to interact with the range of pre-programmed scenarios.
- Correct hand placement during chest compression is detected electronically and confirmed on console.
- Successful completion of the AED scenarios will result in activation of the carotid pulse.

TruMan for Airway Management

- Truman features the unique AirSim airway providing a life-like and anatomically accurate representation for training in oral and nasal intubation. The airway is compatible with the full range of current supraglottic devices.
- Successful ventilation will provide a visible and accurate representation of chest rise and fall.

Training Controller

Truman features an innovative hand held controller with membrane touch pad. The instructor can pre-select AED training scenarios and control pace of learning or choose to train on CPR alone.

CPR RECORDING MANIKIN

Simulaids' new CPR Recording Manikin eliminates the challenge every instructor faces: adequately gauging student performance. This manikin precisely measures all of the actions associated with CPR and compares them to the 2005 AHA CPR Standards. Results are scored as a percentage of the performance compared to the standards. There are no programming issues and no extra equipment needed unless you want to attach the device to your monitor.

Select a performance time span and initiate the recording. When the student completes their skill test for the length of time necessary, the recording device automatically rates the student on a percentage basis according to the preset parameters. For instance, eliminate the ventilation parameters and the score will reflect pure compression information. Leave all the parameters active and you can determine when certifiable CPR has been performed. Print options allow you to store the record or create paper documents. Real time evaluation of the students' performance by the instructor occurs by visualizing the monitor screen on the waist cross-section of the manikin. You may also connect the unit to your monitor for large screen access. Instructor correction and encouragement changes a poor performance into an acceptable one. Print out the performance and show the student how much they have improved.

This manikin utilizes the Brad-style airway and face pieces. Included with the manikin are three face pieces, three lungs, carry case, and user information. One-year warranty.

#CPR4000

GREG

Strong, sturdy construction and realistic anatomical landmarks make this adult manikin ideal for BLS training. Features include fully-articulating head, chin, jaw and neck; realistic chest rise; easily accessible chest cavity with rib cage, lungs, and heart; carotid and femoral arterial pulse points; and jointed appendages. Eyes open and close, with one dilated pupil. Dark skin manikins available. Includes 10 disposable airways, and carry case.

CHOKING CHARLIE

An effective training tool for correctly practicing the Abdominal Thrust (or Heimlich) Maneuver. Students can learn correct hand placement on rib cage and navel for both conscious and unconscious patient scenarios. Bolus (simulated meatballs) may be expelled with proper technique. Talcum powder simulates human saliva. Includes five boluses, talcum powder, tank top, and carrying case. Contains latex. One-year warranty; 33 lbs.

#102-00001

#102-00150 Extra boluses (4 pk)

OBESE CHOKING MANIKIN

An important addition to your teaching tool kit. Students can practice proper hand placement, effective abdominal thrusts, and protocols for working with pregnant, older, or heavier choking victims. Anatomical features are limited, just as in overweight adults. The navel is present, however the rib cage remains hidden (as is the case with a heavier or pregnant patient). Includes two foreign body objects, soft carrying bag. Three-year warranty; 23 lbs.

#OBESE1

FAT OLD FRED

This unique manikin better represents many victims who are older or obese, and helps prepare students to respond to a more realistic cardiac event. Features a large body type (with an extra layer of fat); realistic head tilt and chin lift for opening the airway; older facial features; and palpable, visual anatomical landmarks (including sternum, rib cage, and substernal notch). Airway can be manipulated for airway obstruction or choking scenarios. Includes three mouth/nose pieces, three disposable airways, and a convenient carrying bag. Three-year warranty; 20 lbs.

#BPAK5 (5 pk)

RESUSCITIMER™

The ResusciTIMER can guide rescuers and students through proper ventilation technique. Simply attach ResusciTIMER to the BVM and three LED displays track inspirator time, breaths per minute, and delivered airway pressure. Other features include audible and visual cues; settings for CPR and rescue breathing; settings for adult and child patients; and for training classes, a multiple student/patient option. Works on all makes and models. Includes unit, one Airway Pressure Adaptor (for BVMs without a manometer port), tube assembly, 9v battery and velcro attachment strap.

#L700

#L770 Airway Pressure Adapter (15 pk)

#L770-S Single Airway Pressure Adapter

SPUR® II DISPOSABLE RESUSCITATORS

BEST SELLER! Ambu SPUR II features a unique, small shape that is easy to hold, yet still provides optimum stroke volumes with just one hand. The bag is thin and responsive, with a SafeGrip™ surface that ensures a firm, steady grip. Key features include: a unique, single-shutter valve system for reliable function; integrated handle for user comfort; and a medication port that permits quick delivery without disconnecting the SPUR II from the ET tube.

#SPUR11 Adult – Stroke volume: 800ml (one hand); 1100ml (two hands)

#SPUR14 Child – Stroke volume: 450ml

#SPUR12 Infant – Stroke volume 150ml

BAG II™

The Laerdal BVM has been redesigned so it can provide better performance. The BAGII has features such as: transparent PVC construction, latex free, adjustable hook & loop handle, reinforced non-kink tubing, oxygen reservoir, and universal tubing that connects directly to the flowmeter. Performs well in both low and high temperature conditions (0-122°F or -18 to 50°C).

#845011 Adult #5

#845041 Adult Small #4

#845021 Child #3

#845031 Infant #2

RUSCH DISPOSABLE MANUAL RESUSCITATORS

Fully assembled and designed to meet ASTM and ISO standards, this bag is fully collapsible for easy and convenient storage. One-way valve directs exhaled gas away from caregiver. Other features include clear cushion face mask for easy visual check, textured bag for secure grip, and kink-resistant oxygen tubing. Swivel patient connector (15mmID/22mm OD). Single-use; latex-free.

BAG RESERVOIR

#R1003 Adult (1500ml bag volume)

PHILIPS

PHILIPS HEARTSTART ONSITE AED TRAINER

This small, lightweight trainer, which mimics the Onsite AED, can be carried easily to the patient's side during training. With clear voice instructions, the HeartStart guides the lay rescuer through each step of defibrillation. If a shock is needed, an orange 'shock' button flashes. If a shock is not needed, voice instructions walk the rescuer through CPR. This simple-to-use trainer features a long-life battery and can be used to train for adult or pediatric cardiac emergencies. Includes carrying case, adult training pads and external adapter.

#M5089A External manikin adapter (5 pk)

ZOLL

ZOLL AED PLUS AED TRAINER

With this trainer, choose from 4 different fixed scenarios or use the remote and have complete manual control of the entire rescue. The wireless remote allows you to set up a rescue scenario and download it to the trainer in seconds. The instructor then has control on when the student should shock, if the pads are placed correctly, etc. This units includes a remote control, one set of AED Plus training CPR-D padz, reusable gel, 4 D batteries, 2 AA batteries, and an operators guide.

#ZOLL-Trainer
#8900-0804-01 CPR-D Padz Training Electrode (One reusable Z-design electrode with CPR hand placement indicator and one pair of adhesive gels)

THE POWERHEART® G3 AED TRAINER

This newly updated, fuller size trainer is an easy-to-use unit that provides training for both the FirstSave G3 and the Powerheart G3. Features instructive, intuitive voice prompts (in six languages: English, Spanish, French, Italian, Portuguese, and Greek) with a wireless remote to change languages quickly. Semi- and fully automatic modes provide flexible training. Also features: one-button operation; preconnected, reusable nonpolarized electrodes; and built-in metronome for even compression pacing. Special 'advance' button allows instructors to regulate training, ensuring that students become confident with each step. Use with any manikin. The trainer includes one set of electrodes, remote control, a fully automatic control panel overlay, and a user manual. Requires one 9V battery, not included.

defibtech

Lightweight and simple to use, Defibtech is an ideal choice for training the lay rescuer. A non-intimidating display, with over-sized buttons and clear voice prompts, makes life-saving easier, and helps students build confidence in their ability to respond. Up to four AED trainers can be operated with just one remote, so instructors can supervise multiple training scenarios. Package includes AED trainer, training pads, rechargeable battery (with charger) and remote control.

HEARTSTART ONSITE

PHILIPS

Based on extensive research and user feedback, Philips developed the HeartStart OnSite AED, a streamlined, simplified unit that's so easy to use anyone can save a life. Features SMART Analysis for heart rhythm assessment, and SMART Biphasic technology to determine defibrillation energy delivery. If a shockable heart rhythm is indicated, the defibrillator directs the rescuer to press the flashing orange "shock" button. If no shock is required, the unit provides instructions to assess the patient and can walk the rescuer through CPR, complete with voice instructions on the frequency and depth of compressions. Five-year warranty; 3.3 lbs.

#M5066A-1 Unit with standard carry case

#M5066A-2 Unit with slim carry case

#M5066A-3 Unit with vinyl sleeve only

#M5071A Adult SMART Pads Cartridge

#M5072A Reduced Energy Infant/Child Pads

#M5070A Battery (four-year shelf life)

#M5075A Carry case alone

With CPR Coaching for CPR assistance

PHILIPS

HEARTSTART FRx

Guides rescuers through each step with clear voice commands and descriptive visual icons. The blue i-button activates HeartStart CPR Coaching for CPR assistance, and flashing icons can be used for defibrillation – even in loud, disruptive situations. To treat a child or infant, simply insert the infant/child key; the device adjusts pad placement and CPR instructions. Compatible with professional-grade AEDs to ensure continuity of care. Four-year battery; auto self-tests. Five-year warranty; 3.5 lbs.

WORLDPOINT® AED PREP KIT™

Ensure that your AEDs are equipped with all the 'accessories for readiness' recommended by the American Heart Association. Our easy-to-open plastic bag attaches to any brand of AED and fits in all rescue cases (above).

Updated for new AHA Guidelines, this Kit includes a pocket Mask with an extra replacement valve; gloves; biohazard bag; trauma scissors; disposable towel; disposable razor; and three antiseptic wipes – all in a convenient package.

#WP-911

SAFETYMATE 3

NEW

Safety Mate for the New Parent is a hand-held, interactive talking first aid guide. An innovative solution for family first aid needs. Parents now have a fresh and inventive way to learn how to help their baby in case of an actual emergency.

Includes eight first aid themes:

CPR, Unconscious	Burns
Choking, Breathing	Falls, Bone Injury
Allergic Reaction	Poison, Bites, Stings
Bleeding	Seizures

Just push a button and Safety Mate immediately begins to talk the caretaker through step-by-step instructions for 30-plus medical issues. Allows parents to act quickly and make the most of precious minutes. No fear of forgetting proper emergency procedures.

#SAFETY-MATE3

#CHARGER

Features:

- Immediate access to critical emergency information at the touch of a button
- Covers infant, child and adult emergencies
- Lightweight, hand-held model fits compactly into stroller, diaper bag, purse, briefcase or glove box
- Water resistant for outdoor settings
- Flashing lighted key prompts caretaker to valuable information based on specific situation
- Bilingual in English and Spanish
- Audible/visual low battery warning
- Integral protective cover turns device on when opened
- Includes 4 AA Alkaline Batteries

Strengthens the chain of survival by providing quick and clear instructions for the first person on the scene. Excellent product for resale –call for special volume

SAFETYMATE EMERGENCY INFORMATION DEVICE

Complies with the latest AHA Guidelines. SafetyMate is an interactive, portable Emergency Information Device (EID) that verbally coaches any rescuer through a medical or security emergency. SafetyMate closes the gap in response time by providing immediate and efficient coaching during a medical emergency until professional help arrives.

Users/first responders follow step-by-step instructions or answer simple questions by pressing the appropriate button on the SafetyMate keypad which can help anyone respond to a wide variety of medical emergencies quickly and effectively.

Easy-to-understand life-saving verbal instructions (in English and Spanish) for:

- Convulsions
- Homeland security
- Eye injury
- Fractures
- Bleeding
- Choking
- Unresponsive CPR
- Electric shock
- Amputation
- Head, spine, neck injuries
- Chest pain
- Unresponsive CPR

Designed to meet the specific needs of both the commercial and the consumer personal safety markets. Audible and visual low battery indicator. Includes 4 rechargeable AA batteries, wall mount battery charger with AC adapter. 2 lbs; 8" x 11 1/2" x 3 1/2". Complies with FCC standards.

FIRST RESPONDER SERIES NEW from WorldPoint

INSTRUCTOR TOOLKIT CD-ROM

This CD-ROM contains: Lecture Outlines - This is a complete, ready-to-use lesson plan from the Instructor's Resource Manual that outlines all of the topics covered in the text. Lesson plans can be modified and edited to meet your needs; PowerPoint Presentations—The slides provide you with a powerful way to make presentations that are educational and engaging to your students. The slides can be modified and edited to fit your individual presentation; Image Bank and Table Bank—This feature provides many of the images and tables from the book, allowing you to incorporate more images into the PowerPoint presentations, make handouts, or enlarge a specific image for further discussion; a Test Bank—A new bank of test questions that corresponds to the chapters in the text and includes both general knowledge and critical thinking questions; and Skill Sheets—Ready to use sheets that allow you to track students' skills and conduct skill proficiency exams.

#MED2683

INSTRUCTOR RESOURCE MANUAL

The Instructor's Resource Manual is your guide to the entire teaching and learning system. It has been designed to assist you with creative ideas and tools to incorporate all of the components of the teaching and learning system For each chapter, this indispensable manual includes:

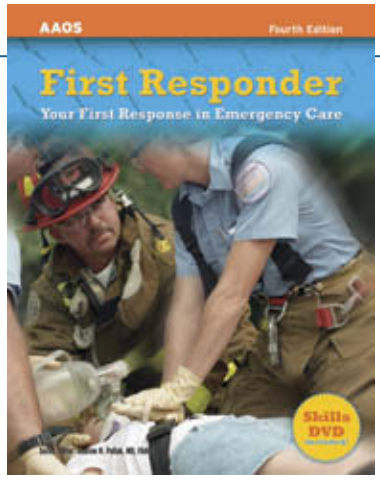
- Chapter overview and objectives
- Support materials
- Enhancements
- Teaching Tips
- Readings and preparations
- Presentation overview
- Lesson plans and corresponding PowerPoint slide text
- Skill Drill evaluation sheets
- Answers to all end-of-chapter students questions found in the text
- Activities and assignments
- National Registry skill sheets

#MED2690

STUDENT SKILLS DVD

Packaged free with each copy of the Fourth Edition, this DVD provides students with a walk-through of the skills that are required to successfully complete the national first responder practical examination process. For each skill, students can visually learn the steps and will find helpful information, tips, and pointers designed to facilitate their progression through the practical examination, specifically: Objectives, Equipment, Key steps to perform to successfully complete the skill, and Critical errors that result in failure.

#MED2706



MANUAL 4TH EDITION

Designed to meet the needs of law enforcement personnel, fire fighters, rescue squad personnel, athletic trainers, college students, and laypersons, the new features found in the Fourth Edition will help students take the next step toward becoming outstanding First Responders. These features include: Endorsement by the American Academy of Orthopedic Surgeons; You are the Provider which contains attention-grabbing case studies found in every chapter; Special Population Tips which discusses the specific needs & emergency care of special populations, including pediatric, geriatric, and special needs patients; and Enhanced skill drills. The manual includes a free review skills DVD (MED2706).

#MED0313

STUDENT WORKBOOK

The Student Workbook contains exercises to reinforce what you will learn in both First Responder: Your First Response in Emergency Care, Fourth Edition and the classroom. The exercises cover the DOT First Responder National Standard Curriculum, and are designed to encourage critical thinking and aid comprehension through a variety of activities for each chapter including:

- Multiple Choice: Numerous multiple-choice questions prepare students for exams.
- You Make the Call: Scenarios help students develop decision-making skills by describing emergencies and challenging them to come up with solutions.
- Skill Drills: Students can test their skills with photo jumbles and caption fill-ins. They can place photos in the correct order to test their knowledge of a skill and fill in the captions to ensure that they know all of the steps for the skill.
- Labeling: Students can master difficult concepts with illustration-labeling activities.
- Word Fun: Students can quiz their knowledge of terminology and spelling with these crossword puzzles.
- And more: True/False, matching, short answer, and fill-in-the-blank questions.

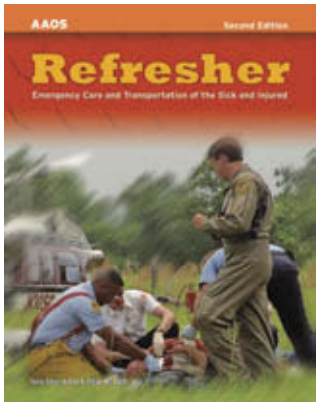
This indispensable CD-ROM contains detailed lesson plans that are keyed to the PowerPoint presentations with sample lectures, quizzes, teaching strategies, teaching tips and idea to enhance your classroom presentation, answers to all end-of-chapter student questions found in the text, and Skill Drill evaluation sheets.

#MED2737

MANUAL



The Complete EMT-Basic Refresher Training Solution! Refresher: Emergency Care and Transportation of the Sick and Injured, Second Edition is written with the experienced EMT-Basic in mind. It is designed to meet the needs of EMT-Basics who are in the process of recertifying, in all settings and at all skill levels. Refresher is part of an integrated teaching and learning system that brings the best resources to both EMS instructors and recertifying EMT-Basics. It combines complete medical content with dynamic new features and interactive technology to support instructors and providers. The Second Edition thoroughly covers the U.S. Department of Transportation (DOT) EMT-Basic Refresher National Standard Curriculum, and includes a wealth of enhancements to enrich EMT-Basic education.

#MED2294

ALS SKILLS REVIEW

TEACHING PACKAGE

DISCONTINUED

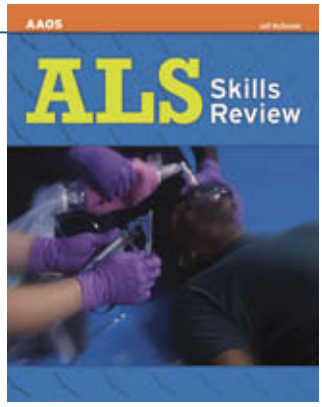
ALS Skills Review provides detailed step-by-step instruction for the core psychomotor skills presented in the Paramedic National Standard Curriculum. This resource teaches ALS students and providers how to perform each skill correctly and offers helpful information, tips, and pointers designed to facilitate progression through practical examinations or real-life scenarios.
For each skill, you will find:

- Performance objectives, indications, contradictions, complications, and an equipment list
- Written step-by-step instructions to properly perform the skill with photos to demonstrate critical steps.
- Helpful tips including Safety, Special Populations, and In the Field.

ALS skills are grouped into the following categories: Airway Management and Ventilation, Cardiovascular Emergencies, Patient Assessment and Management, Vascular Access and Medication Administration, Medical, Trauma Management, Neonatology and Obstetrics, and Operations.

#MED7014

MANUAL



The manual reinforces understanding allowing students to obtain a firm grasp of the advanced life support skills in the Paramedic National Standard Curriculum. Skills are grouped into the following categories:Advanced Airway and Ventilation; Advanced Cardiovascular Management; Advanced Medical Administration; General Medical Skills; Neonate skills; and Vascular access. Each skill includes a performance objective, indications, contradictions, complications, an equipment list, and written step-by-step procedures reinforced with photos to demonstrate critical steps. Helpful tips are provided along the way including, Safety, Special Population, and In the Field tips. Check Your Knowledge questions can be found at the end of each section. These case-based questions encourage students to test their knowledge of the skills presented in the manual. An answer key is also provided.

#MED1210

#MED2248 (DVD: Illustrates and narrates the steps presented in the manual.

EMS CHALLENGE™ GAME

EMS CHALLENGE™ is a board game designed specifically for pre-hospital care providers (Emergency Medical Responders, Emergency Medical Technicians, Paramedics, Firefighters, etc.). This board game can be played with as little as two people and can be utilized in any environment; whether in the classroom, at work, or at home. EMS CHALLENGE™ consists of a game board, 4 tokens, one die, and 400 medical knowledge question cards pertaining to medical terminology, definitions, anatomy and physiology, and miscellaneous questions. The question cards are based on an EMR's (First Responder's) level of knowledge. Add the IV Therapy flash cards (#IV-CARD) as another form of question cards or for more variety!

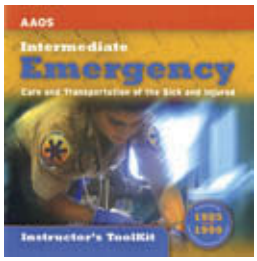
EMERGENCY CARE & TRANSPORTAION OF THE SICK & INJURED NEW from WorldPoint

INSTRUCTOR TOOLKIT CD-ROM



Preparing for class is easy with the resources found on this CD-ROM, including:

- PowerPoint Presentations, providing you with a powerful way to make presentations that are both educational and engaging to your students. Separated into two folders, 1999 presentations and 1985 presentations, the slides can be modified and edited to meet your needs.
- Lecture Outlines, providing you with complete, ready-to-use lesson plans that outline all of the topics covered in the text. The information that applies only to the 1999 National Standard Curriculum is labeled with the 1999 icon. The lesson plans can be modified and edited to fit your course.
- Electronic Test Bank, containing multiple-choice and scenario-based questions, allows you to originate tailor-made classroom tests and quizzes quickly and easily by selecting, editing, organizing, and printing a test along with an answer key. All test questions are separated into 1999 questions and 1985 questions.
- Image Bank, providing you with many of the images found in the text. You can use them to incorporate more images into the PowerPoint presentations, make handouts, or enlarge a specific image for further discussion.
- Skill Sheets, allowing you to track students' skills and conduct skill proficiency exams.

#MED5164

REVISED INSTRUCTOR'S RESOURCE MANUAL CD-ROM

Available on CD-ROM, the Instructor's Resource Manual is your guide to the entire teaching and learning system. This indispensable CD contains:

- Detailed lesson plans that are keyed to the PowerPoint presentations with sample lectures, lesson quizzes, and teaching strategies.
- Teaching tips and ideas to enhance your classroom presentation.
- Answers to all end-of-chapter student questions found in the text.
- Skill Drill evaluation sheets

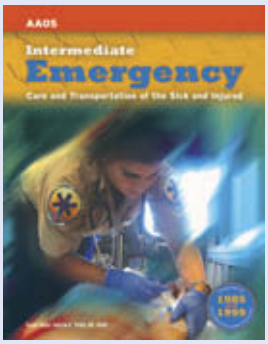
#MED5675

INSTRUCTOR TEST BANK

Following both the 1999 and 1985 DOT National Standard Curricula, this Test Bank provides you with:

- More than 1,000 multiple-choice and scenario-based questions based on the 1999 curriculum.
- More than 1,000 multiple-choice and scenario-based questions based on the 1985 curriculum.
- Page references to Intermediate.

#MED7406



STUDENT MANUAL

Intermediate: Emergency Care and Transportation of the Sick and Injured is the only text available that addresses the objectives in both the 1985 and 1999 EMT-Intermediate National Standard curricula. This text bridges the gap between the two curricula while still keeping them separate, making it user friendly for any instructor or student. Intermediate is the core of a teaching and learning system with features that reinforce and expand on the essential information and make information retrieval a snap.

#MED5171

STUDENT REVIEW MANUAL

Designed to prepare students to sit for exams by including the same type of multiple choice questions that they are likely to see on classroom and national examinations, the Intermediate: Emergency Care and Transportation of the Sick and Injured Student Review Manual covers both the 1985 and 1999 curriculums. The Student Review Manual contains multiple-choice question exams with an answer key and page references to Intermediate.

The Student Review Manual is available in three formats: print, CD-ROM, and online.

#MED0840

#MED4664 (CD-ROM)

EMT-INTERMEDIATE PEARLS OF WISDOM, 2E MANUAL

This is an excellent study guide for EMT-Intermediate students going through initial or refresher EMT-Intermediate training. It is a collection of rapid-fire questions and answers designed to help students prepare for EMT-Intermediate state and national certification and refresher exams. It consists of "pearls"—succinct pieces of knowledge in a question and answer format. Designed to maximize test scores, EMT-Intermediate: Pearls of Wisdom prunes complex concepts down to the simplest kernel. EMT-Intermediate: Pearls of Wisdom is written in direct correlation to the U.S. DOT 1999 EMT-Intermediate National Standard Curriculum. Objectives are covered in the order and manner in which they appear in the curriculum.

#MED2887

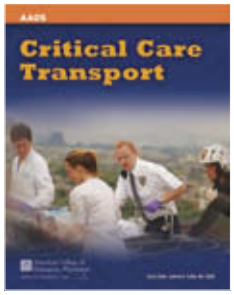
EMT-INTERMEDIATE REVIEW MANUAL FOR NATIONAL CERTIFICATION

The EMT-Intermediate Review Manual for National Certification is a one-of-a-kind review manual designed to prepare students to sit for the National Certification Exam, based on the 1999 curriculum. The manual includes practice questions with answers and model exam; step-by-step walkthrough of skills, including helpful tips, commonly made errors, and sample scenarios; a self-scoring guide; and winning test-taking tips. Copies of the performance skill sheets, requirements for successful completion of each skill, and common errors made during the performance of each skill are also included.

#MED4701

NEW from WorldPoint

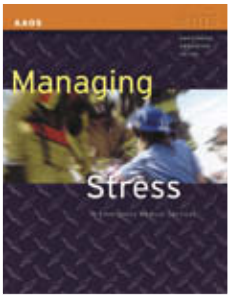
CRITICAL CARE TRANSPORT MANUAL



The critical care environment demands specialized knowledge and skills and requires providers to bridge the gap between prehospital and hospital care. **Critical Care Transport** thoroughly prepares prehospital professionals to function as competent members of a critical care team by covering the material that everyone—paramedics, nurses, physicians, and specialty crew—needs to know to operate effectively in the prehospital critical care environment. Covering both ground and flight transport, this text has been created for students in critical care training courses and those preparing to take the Certified Flight Paramedic (FP-C) exam. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, trauma, and pharmacology are covered in the context of critical care. Chapters have been authored by leading critical care professionals across the country and represent the most current, state-of-the-art information on management of critical care patients.

#MED2235

MANAGING STRESS IN EMS



Whether you are a firefighter, an EMT, a paramedic, a first responder, or a dispatcher, as an emergency care provider, you spend your days, nights, and even weekends caring for others. But who is caring for you? EMS professionals must constantly refine their stress management skills in order to live their lives with a greater sense of balance. Not only will this text alert EMS professionals to the stressors in their lives, but it will teach them to identify problem situations and effectively resolve issues, leading to a healthier, more fulfilling lifestyle.

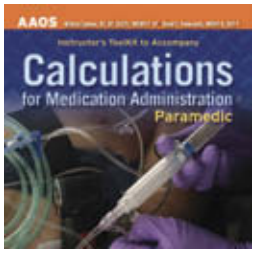
PARAMEDIC: CALCULATIONS FOR MEDICATION ADMINISTRATION

INSTRUCTOR TOOLKIT CD-ROM



All the necessary resources are found on this CD-ROM to help you prepare for this course. Incudes powerpoint presentations, lecture outlines, handouts and much more!

#MED2101

PARAMEDIC REVIEW MANUAL FOR NATIONAL CERTIFICATION WITH '05 ECC GDLS, REVISED

The Paramedic Review Manual for National Certification is designed to prepare students to sit for the national certification exam by including the same type of skill-based and multiple-choice questions that are likely to appear on the exam. The review manual will evaluate students' mastery of the material presented in their paramedic training program. Students will be able to complete practice quizzes and identify any weak areas, allowing for adjustment in pre-exam studies. Copies of the performance skill sheets, requirements for successful completion of each skill, and common errors made during the performance of each skill are also included.

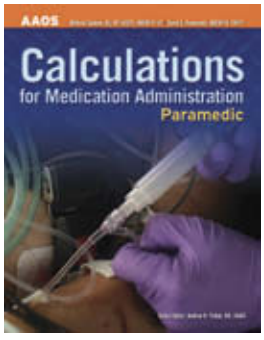
#MED5188

PARAMEDIC: ANATOMY AND PHYSIOLOGY, 1E REVISED

Paramedic: Anatomy and Physiology utilizes a systemic approach, beginning by formulating a basic picture of the human body then moving into more anatomic detail. Individual chapters discuss body systems, both how they function individually and together as a unit. In addition to the overall picture of each system, this text presents both the gross anatomy and the microscopic anatomy of vital structures. Since the study of anatomy and physiology requires some basic chemistry knowledge, there is a basic chemistry review provided in the Appendix.

#MED7924

MANUAL



This textbook teaches the basic principles of mathematics and applies these principles to cases that paramedics face on the job. Chapters cover math rules and principles; fractions, decimals, and percentages; ratios, proportions, and conversion factors; and rate-dependent and weight-based calculations.

Practice problems are scattered throughout the chapters; students practice as they go. Every chapter highlights how paramedics can make use of the math knowledge that they already have in order to solve more complicated problems. Chapters begin with the simple and obvious, and progress to the level used in the field.

Practice makes perfect—this text has over 700 practice problems! In addition to the in-chapter practice, chapters conclude with more problems. Complete answers to every problem, including explanations, are provided in the answer key. Every step is included, making it easy to follow how an answer was reached.

#MED6834

MEDICAL CASE STUDIES FOR THE PARAMEDIC

Paramedics must perform a systematic assessment of the patient, determine appropriate treatment, and give it. While assessment and management principles are learned in initial training, they are not practiced until training is completed. Now, paramedic students can apply these principles with Medical Case Studies for the Paramedic.

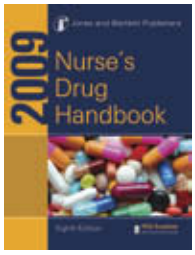
Medical Case Studies for the Paramedic presents 20 case studies on the most important medical emergencies for the ALS-level reader. The types of emergencies include a range of presentations such as semi consciousness, unconsciousness, difficulty breathing, weakness, nausea, headache, slurred speech, chest pain, allergic reaction, seizure, and anxiety. Each case study is presented in full, poses questions to the reader, and is followed by a summary of the case, including answers to the questions posed.

A superb supplement to classroom and textbook learning, this book allows the reader to practice applying knowledge to cases before actually going on an emergency call.

#MED5815

NEW from WorldPoint

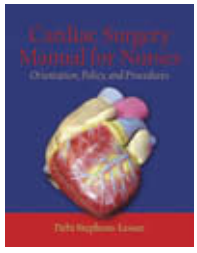
2009 NURSES DRUG HANDBOOK



Everything you need in a Nursing Drug Guide, plus "Mechanism of Action" illustrations, Patient Teaching bullets, and Nursing Considerations for every drug. And $2-$3 cheaper than other Nursing Drug Guides on the market.

#MED5477

CARDIAC SURGERY MANUAL FOR NURSES



This policy and procedure book is a valuable resource for new or existing cardiac surgery programs. It provides support for each procedure in the cardiac surgery environment to include standards of practice, risk management, staffing competencies, and quality indicators to optimize care of the cardiovascular surgery patient. The policy manual is based upon AORN standards and meets JCAHO standards for the operating room environment.

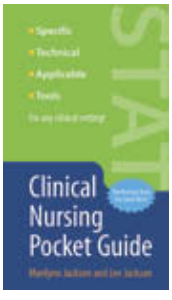
#MED4892

CRITICAL CARE NURSING HANDBOOK

Offers clinician's quick access to the latest treatment guidelines for the specific diseases and conditions most commonly found in the ER or ICU so they can treat the most vulnerable patients effectively and efficiently.

#MED1340

CLINICAL NURSING POCKET GUIDE



This convenient pocket guide contains all the information clinical nurses need at their fingertips on the hospital floor—instructions, basic conversion charts, assessment checklists, scales, tables, anatomies, lab tests, charting, medication indications and administration, and other basic information for quick reference.

#MED4150

CLINICAL RESEARCH IN PRACTICE: A GUIDE FOR THE BEDSIDE SCIENTIST

A straightforward guide to reading, evaluating, and using research in these clinical settings. The text helps the bedside scientist take a study from question to design to practice.

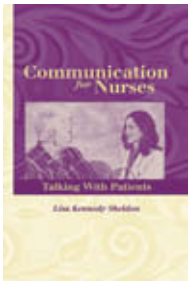
#MED8754

CLINICAL INSTRUCTION & EVALUATION: A TEACHING RESOURCE 2ND ED

Designed to effectively guide instructors within the learning process, Clinical Instruction and Evaluation: A Teaching Resource provides clinical nurses with the theoretical background and practical tools necessary to succeed as a clinical nursing instructor. The theory used to support the practice of clinical education is presented in a straightforward, easily understood manner.

#MED8587

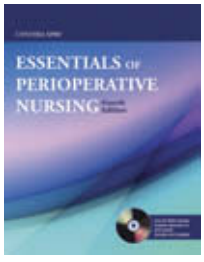
COMMUNICATION FOR NURSES: TALKING WITH PATIENTS



Offers direct, effective techniques that are delivered in a concise, user-friendly format that enables readers to develop a professional communication style. The early chapters review nursing, communication, and developmental theories. Issues of cultural diversity and patient rights are discussed, providing a thoughtful perspective on communication.

#MED5968

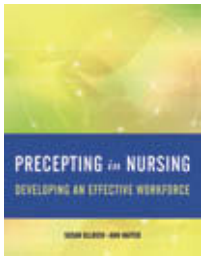
ESSENTIALS OF PERIOPERATIVE NURSING, 4TH ED



Gives any new perioperative nurse a head start on achieving perioperative competency, as well as serving as an excellent refresher for the experienced nurse to test his or her knowledge of fundamental OR practice. This unique resource includes such features as objectives, course outlines, testing tools, and competency checklists. Includes a free test bank CD-ROM!

#MED8813

PRECEPTING IN NURSING: DEVELOPING & EFFECTIVE WORKFORCE



An excellent resource for Health Care Agencies and Schools of Nursing seeking to prepare staff nurses to precept student nurses, new graduates, and experienced nurses. Each chapter introduces concepts essential to preceptor development, suggests strategies for concept application, and presents questions and situations to guide learning.

#MED8455

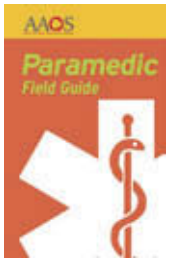
NEW from WorldPoint

PARAMEDIC FIELD GUIDE

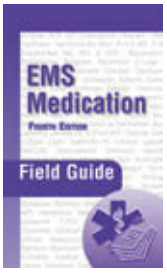


This convenient field guide contains all the information that paramedics need at their fingertips in the field—assessment checklists, anatomic illustrations, vital sign ranges, airway management, medication indications and administration, arrhythmias, and other basic information in the form of tables and charts for quick reference. The full-color, spiral-bound guide is divided into sections that follow the U.S. DOT EMT-Paramedic National Standard Curriculum; sections are divided by color-coded tabs to allow rapid retrieval of information when paramedics need it most.

Paramedics will be able to confirm appropriate pediatric ET tube sizes, emergency measures in the event of an infectious exposure, signs and symptoms of acute illnesses, conditions that warrant supplemental oxygen administration, fracture classifications based on displacement, and much more.

#MED1227

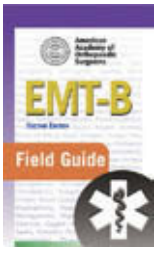
EMS MEDICATION FIELD GUIDE, 4E



Pocket-sized, spiral bound, and water-resistant, the EMS Medication Field Guide, Fourth Edition is a quick reference guide to drug and toxicology information will speed your recognition of unfamiliar drugs, improving your field care and treatment of the overdose or poison patient.

#MED4244

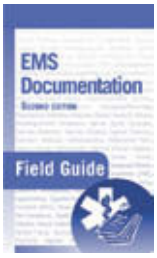
EMT-B FIELD GUIDE, 2E



The Second Edition of this handy pocket-sized reference guide, geared specifically toward the EMT-Basic, will provide easy access to the vital emergency information needed by prehospital personnel. It is a great resource for fast review of important step-by-step procedures, offering just the right amount of information to guide actions and reactions in the field.

#MED2142

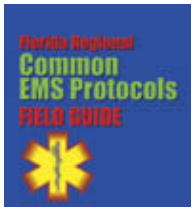
EMS DOCUMENTATION FIELD GUIDE, 2E



EMS providers learn the skills that allow them to give state-of-the-art care at the scene. Unfortunately, how to document that care so that it is not called into question two days or even two years down the road is often not taught in-depth. In order to help EMTs with this important subject, we assembled this water resistant, pocket-sized guide for providers at all levels, examining many of the common calls EMTs receive and following a standard protocol for the preparation of EMS run reports.

#MED2166

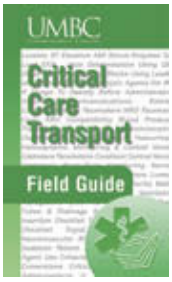
FLORIDA REGIONAL COMMON EMS PROTOCOLS FIELD GUIDE



Designed as a companion to the Florida Regional Common EMS Protocols manual (#MED8083), this pocket-sized, spiral bound field guide allows for fast reference in the field. The protocols in the field guide are based on National Standards and the most recent clinical studies regarding the delivery of pre-hospital care.

#MED0390

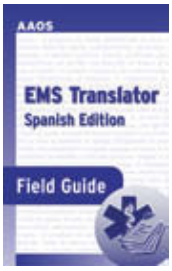
CRITICAL CARE TRANSPORT FIELD GUIDE



The Critical Care Transport Field Guide is designed with the special needs of field practitioners in mind. This useful, quick reference guide helps speed recognition of lab values, 12-lead ECG interpretation, fibrinolytics agents, hemodynamic monitoring, IABPs, rapid sequence intubation, chest tubes, and therapeutic medications and toxicology for the critical care transport provider. This guide is pocket size and water resistant.

#MED5809

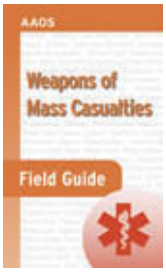
EMS TRANSLATOR FIELD GUIDE: SPANISH EDITION



The EMS Translator Field Guide, Spanish Edition allows the provider to simply point to Spanish questions and explanations, rather than requiring him or her to learn the language or pronounce words phonetically. When the provider needs to obtain more information from the patient about his or her medical condition, the provider selects a question they wish to ask from a list of queries written in English and then simply points to the corresponding question in Spanish. The Spanish-speaking patient then needs only to answer "yes" or "no" to the questions posed to him or her. The English and the Spanish translation are laid out side-by-side, allowing the English-speaking provider to quickly find and point to the Spanish version. Moreover, the Field Guide's topics are arranged alphabetically by medical condition, ensuring that the EMT can quickly and effectively communicate with his or her patient.

#MED1649

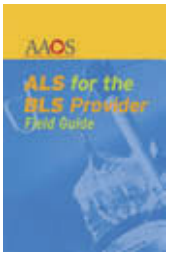
WEAPONS OF MASS CASUALTIES FIELD GUIDE



This guide provides quick access to critical life-saving information. It was designed with the special needs of emergency services personnel and security professionals in mind! Durable, water-resistant, spiral bound, and compact, these specialized field guides are made for your convenience.

#MED2456

ALS FOR THE BLS PROVIDER FIELD GUIDE



A tool that allows first responders and EMT-Basics to provide quality assistance to their ALS counterparts. The guide features bulleted text and illustrations that guide BLS personnel through critical knowledge and skills and will enable them to better recognize, assist, and anticipate the needs of an ALS provider.

6'1" realistic manikin, in two weights

Used by the US military, fire and police departments, as well as emergency and safety teams

RESCUE RANDY (FULL BODY)

The official manikin of the Firefighter Combat Challenge. Used by the US Military, fire, and police departments, as well as safety teams and emergency personnel. Developed to replicate the most lifelike adult patient handling, transportation and extrication training, these manikins can be used safely in scenarios that might be too dangerous or uncomfortable for human volunteers. Made of tough cast vinyl with zinc-plated steel frame for durability and longevity. Features realistic human weight distribution and fully articulated joints for positioning in cars, or other critical rescue scenarios such as a mountain rescue, mine cave-in, tunnel or ladder carry-down. 6'1" tall, in two weights. Clothing not included.

#RANDY145 6' 1", 145 lbs

#RANDY165 6' 1", 165 lbs

#BAG2094 Carry/Storage bag

SAME-DAY SHIPPING! (on in-stock items)

Just place your order by 3 PM CST, Monday through Friday.

CPR/TRAUMA MANIKIN (FULL BODY)

Train with real-life trauma conditions. Realistically replicates likely trauma conditions, and allows for CPR and first aid practice. Features carotid pulse, lifelike anatomical landmarks (including sternum, rib cage, and substernal notch), along with skin/skeletal responsiveness (such as realistic resistance for chest compressions). Airway ball valve design allows lungs to inflate with correct head position. Includes sweatsuit, five mouth/ nosepiece and five airway systems (with lungs). Instructors can extend training possibilities with additional moulage kit. 60 lbs. 50" x 12" x 21".

#TRAUMA1 CPR/Trauma Manikin

#MNP023 Mouth/Nosepieces (10 pk)

#LBG2030 Replacement lungs (20 pk)

#BAG1373 Carrying bag

#KIT6701 Trauma moulage kit

MOULAGE MOVIE

Moulage instruction is hard to find – but now, Simulaids has an effective video that addresses that need. Produced in conjunction with a leading artist using Hollywood techniques, the 'Moulage Movie' explains the use and application of every portion of casualty simulation. Instructors can start simply and go for realism; each segment of moulage is represented with the frames you'll see during this 45 minute presentation. Use this movie as a base to build your repertoire of the most realistic moulage – and add challenge to your next casualty incident.

#880

LIFE/FORM® CRiSis™ MANIKINS

Designed for every level of ACLS, EMT, paramedic, and nurse training. Complete resuscitation training systems with six skill stations that allow students to practice: CPR, blood pressure monitoring, IV therapy, airway management, ECG monitoring, and defibrillation. Each full-body manikin features an IV arm, a blood pressure arm, chest skin and an airway management head. Advanced features also include: comprehensive head and neck anatomy; cricoid cartilage; separate lungs for auscultation; suctioning and digital intubation capabilities; articulated biceps for antecubital and dorsal access.

In addition, **all adult and pediatric CriSis Manikins** offer realistic flashback from pressurized system; audible blood pressure sounds; five Korotkoff phases; auscultatory gap; as well as manual, semi-automatic and automatic defibrillation.
Three-year warranty.

COMPLETE CRiSis™ MANIKIN

A complete resuscitation system including a full-body CPR manikin, airway management head, IV arm, blood pressure arm, and defibrillation chest skin. Three-year warranty; 55 lbs. (Replacement skin and vein kit available.)

SMART STAT PATIENT SIMULATOR*

(Scenario-based Medically Advanced Resuscitation Trainer)

This economical, versatile simulator allows students at any level of proficiency to improve their skills and strengthen critical thinking skills. One-year warranty.

- Cynosis
- IO sternum and leg
- Mucus and foaming mounth for added realism
- IV catheterization
- CO2 discharge
- ECG simulator function
- Additional scenarios
- Optional trauma bleeding leg
- Easy-to-learn interface
- Tailor scenarios or specific skill practice
- Change conditions to improve skill response-time
- Challenge students as they progress
- Wireless design provides portability for creating training emergencies
- Cost-effective maintenance

INSTRUCTORS CAN ALSO ACCESS:

- An extensive diagnostic heart and lung sound library for expanded auscultation practice
- A full range of additional nursing skill training
- Additional training scenarios

with PDA

PDA STAT MAN

3-YEAR WARRANTY

This 6′ 1″ manikin features nine skill practice work stations, fully-articulating joints, and additional realistic features (including rib cage motion and multiple pulse points. This full-body, 130 lb model allows students to get a better sense of how to respond in a real emergency. PDA STAT Man offers a full range of advanced skill practice options:

- Oral and nasal intubation
- Bilateral chest tube placement with simulated fluid discharge
- Bilateral pneumothorax reduction
- Laryngospasm and cricothyrotomy
- Stomach distension
- Tongue swell
- Arrhythmia training and defibrillation
- 12 pulse points
- IV arm therapy

The PDA allows instructors to choose a scenario from the PDA. This hands-off approach means students practice life-saving skills in a more realistic manner. Instructors can watch events unfold, question students about their actions, and teach critical thinking skills. Includes a hard storage case with wheels for easy transport, a sweat suit, and accessories. Contains latex. 73″ x 34″ x 12″; 130 lbs.

#PDA-MAN

#STAT-MAN Manikin with ECG simulator

MEGACODE KELLY VITALSIM ADVANCED

MegaCode Kelly is a realistic manikin for training in a wide range of advanced life saving skills in pre-hospital emergencies. Features include:

- New improved airway allows for insertion of standard airway devices with the addition of the LMA and Combitube
- 1400+ cardiac rhythms with synchronized pulses allows students to interpret and intervene using defibrillation, pacing, and drug administration
- Use of clinical monitors, defibrillators, and external pacers for practice of live interventions
- Instructor-controlled blood pressure arm allows for realistic palpation and auscultation. Systolic and diastolic pressures, ausculatory gap, and volume are variable
- Allows student assessment of heart, breath and bowel sounds
- Pupillary assessment of normal, constricted and dilated pupils
- Intravenous drug administration via IV bolus or drip using the multivenous pediatric IV arm
- Chest tube insertion can be practiced at the left mid-axillary site, at the 4th and 5th intercostal spaces.
- VitalSim allows for increased functionality including creating, editing and running of scenarios.
- Optional accessories such as Nuclear, Biological and Chemical (NBC), trauma, and bleeding control modules add realism to the training scenarios

MegaCode Kelly Advanced is shipped with the manikin, 6 Neck Skins, 1 roll of Criothyroid Membrane Tape, Airway Lubricant, Jacket, Pants,Carry Case, 6 Chest Tube Modules, BP Cuff, and Directions for use. VitalSim is not included. See part number 200-10001.

Extended warranty available.

#200-05050

#203-05050
(Does not include heart, breath, blood pressure, and bowel sounds)

MEGACODE KID VITALSIM ADVANCED

MegaCode Kid is a realistic manikin for training in a wide range of pediatric advanced life saving skills in pre-hospital emergencies. MegaCode Kid has a realistic airway, 1400+ ECGs rhythms, defibrillation and pacing capabilities, and allows drug administration and intraosseous infusion to teach emergency skills. Features include:

- 1400 + cardiac rhythms with synchronized pulses allows students to interpret and intervene using defibrillation, pacing, and drug administration
- Realistic pediatric airway for insertion of standard airway devices
- Realistic needle insertion and feel at the medial malleolus and tibial tuberosity for intraosseous infusion
- Intravenous drug administration via IV bolus or drip using the multivenous pediatric IV arm
- Allows for the auscultation of normal and abnormal heart, breath, and bowel sounds
- Speech increases realism of scenarios
- Pre-programmed and instructor-controlled scenarios can aid standardized teaching
- Trauma module available to add traumatic injuries and child abuse scars to the training scenario

MegaCode Kid Advanced (VitalSim Capable) Manikin includes the full body Manikin, Multi-Venous IV Training Arm, Intraosseous Leg, Manikin Lubricant, Jacket, Pants, Carry Case and Directions for Use. VitalSim is not included. See part number 200-10001.

Extended warranty available.

#231-05050

#231-15050 (VitalSim capabilities only)

VITALSIM

VitalSim simulates a comprehensive array of core vital signs for effective scenario-based training and skills training. Connect this with the manikins above to increase the functionality. Benefits include preprogrammed and programmable scenarios provide standardized training and ease of use; simple user interface and wireless handheld controller which allows instructors to remain engaged with students for enhanced training; data logging and download capabilities for effective assessment and debriefing; simulates a comprehensive array of core vital signs for effective scenario-based training and skills training, and more! Includes Battery Case and Batteries (6), Remote Control including Batteries (4), Operating Device to Control Unit Cable, USB Cable for connection to PC, AC Adapter, Software CD, Carry Case and Directions for Use.

Extended warranty available.

#200-10001

Laerdal
helping save lives

ALS BABY™

Unparalleled skin and airway realism provide enhanced training. Students can practice team rescue and scenario-based PALS training, including airway management, CPR, vascular access, and 4-lead ECG monitoring. Additional skill practice includes bag-valve mask ventilation, Sellick Maneuver, oral/nasal intubation, laryngeal mask use, gastric tube insertion, and intraosseous needle insertion (with aspiration of simulated bone marrow). Skin pad contains latex. One-year warranty; 18 lbs.

Promote accurate neonatal resuscitation with this lifelike manikin

NEONATAL RESUSCITATION BABY

Promote accurate neonatal resuscitation response with this lifelike manikin. Comprehensive anatomy includes trachea, esophagus, stomach, and simulated lungs. Students can practice the use of the shoulder roll, oro- and nasopharyngeal airway management, including bag-valve mask ventilation. Other life-saving skill practice includes NG/OG tube insertion and administration, gastric lavage/gavage, chest compressions and umbilical vein catheter procedure. Includes three replaceable umbilical cords, simulated umbilical blood, bottle, lubricant, pants, carrying case and directions. One-year warranty; 5 lbs.

#240-00001 Manikin

Construction features life-like range of motion and new materials for superior tactile awareness.

STAT BABY

Developed in conjunction with leading pediatric physicians, this affordable, lifelike simulator provides highly realistic rescue training. STAT Baby is constructed of new materials for developing superior tactile awareness and patient empathy, and a wide range of skill practice, including:

- IO leg
- Peripheral IV (left hand and foot)
- IM left deltoid and thigh and SC injection sites
- PICC line
- ET tube insertion
- Laryngeal spasm
- Tongue edema
- LMA insertion
- NG tube placement with fluid reservoir
- Feeding tube care
- Rectal medication
- Pulses (two brachial, two femoral, and two carotid)
- Defibrillation (shock level 2-4 joules per kg)
- Foley cath insertion (female manikin)
- Pneumothorax

STAT Baby includes IV vein kit, replacement skins, two pneumothorax and two injection sites, four reservoir bags, defibrillator adapters, ECG simulator, and simulated blood powder. Contains latex. Three-year warranty; 18 lbs.

NASCO INTERACTIVE ECG SIMULATOR

The easy-to-operate arrhythmia/pacing simulator combines both defibrillator and external pacer training. Features 17 adult and 17 pediatric ECG rhythms, and the capacity to generate 3- or 4-lead rhythms. The RA, LA, and LL signal morphologies create accurate representations of QRS, R, and T axes. It features: 34 cardiac rhythm simulations; electronic capture during pacing; defibrillate/cardiovert into waiting rhythm; high capacity discharge load, so students can defibrillate directly into simulator; and LED indicator that illuminates features and functions, including low battery. Compatible with most ALS manikins and defibrillators. Battery save feature turns off the simulator when not in use. Three-year warranty.

#SIM100N

PINNACLE TECHNOLOGY ARRHYTHMIA TUTOR

This hand-held simulator has 16 pre-programmed rhythms (both shockable and non-shockable) and three leads that can be connected to any monitor or defibrillator – ideal for ACLS classes where rhythm recognition is essential. Rhythms include sinus rhythm, sinus tach, sinus brady, SVT, PACs in NSR, atrial flutter and fibrillation, junctional escape, 1st- and 2nd-degree black, V Tach, and others. Virtually maintenance-free; operates on a 9v battery. Two-year warranty.

#AT-35

PINNACLE TECHNOLOGY ARRHYTHMIA DISPLAY INTERACTIVE

A universal interface that allows instructors to display arrhythmias on a regular television screen (not included). Compatible with all makes and models of arrhythmia simulators, the unit features a freeze button that allows instructors to freeze the action onscreen. Comes complete with 3-lead cable connector for a simulator and an interface cable that connects to a TV. Powered by AC current. Two-year warranty; 7 lbs.

#ADI-10

SYMBIO CODE SIMULATOR 12-LEAD ARRHYTHMIA SIMULATOR

Generate realistic 12-lead ECG rhythms – or connect your ECG cable to simulator's 10 ECG snaps. Simulate electrical capture with your external pacer or press simulator capture key to select one of four pre-set pacing capture levels (70, 80, 90, or 100mA). 12 waveforms for defibrillation. Simulate cardioversion with your manual, semi-automatic, or automatic defibrillator. LEDs indicators for pacer pulse detection, defibrillation discharge detection, and low battery. Three-year warranty.

#FAST-201
F.A.S.T. 1 Trainer

Cut IO access time to 60 seconds – and save more lives

LIFE/FORM® TOTAL FAST 1™ ADULT STERNAL INTRAOSSEOUS INFUSION TRAINING SYSTEM

Now medical professionals can achieve safer, more reliable, sternal IO access – in 60 seconds. The **F.A.S.T. 1 Adult Sternal IO Simulator** is specifically designed to aid in the training of this essential technique.

Intraosseous infusion is a proven way to get drugs and fluids into a patient fast. Each year, over one million attempts to place an IV line fail. The time to achieve IV access can often take more than 10 minutes. Paramedics, military, and other rescuers often work in confusing, disruptive environments, compounding the challenge of gaining rapid intravenous access. This trainer provides realistic practice that can reduce that response time to **one minute** – and save more lives. The Simulator includes the F.A.S.T. 1 Training System (#P01-044), which includes: SimIO system, demo introducer system, supplies for 10 demonstrations, training video, trainer's manual, training CD, user's manual, F.A.S.T. 1 procedure video, remover, target patch, reset tool, SimStern demo model, SimStern marrow model, insertion, and removal posters. 33.38 lbs.

#WP-NP64044 Adult IO Infusion Training System

#LF06400U Adult Sternal IO Infusion Simulator (alone)

#LF06402U Sternal bone replacement (Pk of 20)

#LF00845U Simulated blood mixture

FAST 1 TRAINER

Allows students to actually insert the FAST 1 infusion catheter using the FAST 1 demonstrator. A replaceable disk provides 10 FAST 1 insertions. Requires training kit.

#FAST-201 F.A.S.T. 1 Trainer

#FAST-202 F.A.S.T. 1 Trainer Replaceable Disks

F.A.S.T. 1™ TRAINING SYSTEM

Developed in partnership with experts in the field, this system teaches sternal IO access technique, and provides vascular access in 60 seconds – with a 95% success rate. This technique offers a quick, effective alternative to IV infusion. FDA approved.

Includes: SimIO system, demo introducer system, supplies for 10 demonstrations, training video, trainer's manual, training CD, user's manual, F.A.S.T. 1 procedure video, remover, target patch, reset tool, SimStern demo model, SimStern marrow model, insertion, and removal posters.

#P01-044 F.A.S.T. 1 Training System (Kit)

SIM IO SYSTEM

The SimIO System allows instructors to create highly realistic IO practice scenarios. This system can be used on volunteer 'patients' to practice and develop the sternal IO technique (all but actual penetration of the skin or sternum).

SimIO System is reusable for cost-effective, repeat training. Includes: SimIO introducer, SimIO patch, protector dome, packaged remover, syringe, and instructions.

#P01-0015 SimIO Training Kit

#P01-0042 Live Kit (for real rescue)

TENSION PNEUMOTHORAX SIMULATOR

This model allows medical personnel to practice proper needle insertion which enables built-up air pressure to escape the thorax. The model accepts needle and thoracotomy in second intercostal space in the midclavical line or fifth intercostal space in the midaxillary line. Complete with foot pump, replacement 2-piece pleural chamber, ribcage, and soft lifelike skin. Soft carry bag included. Procedural needle not included.

#PNE1800

#RP1801 Replacement skin

#RP1805 Two-piece pleural cavity

LIFE/FORM® CRICOTHYROTOMY SIMULATOR

Now all emergency personnel can perfect their emergency cricothyrotomy technique. The prominentia laryngea is prominent on the hyperextended neck. All landmarks are accurately placed and allow for fast action practice. Airway passes completely through from top to bottom which allows for correct stylet and obdurator placement once the 'stab' has been made. Replaceable trachea promotes long-term use. Comes complete with five replacement skins, five cartilage inserts, REN cleaner, instruction guide, and durable carrying case.

#CTS1082

#LF01081U Replacement Kit (three skins and three inserts)

IV-CARDS

IV Therapy is a set of 100 knowledge-based questions for the medical professional that provides IV therapy. These cards review the components of IV therapy skills and knowledge. The IV Therapy cards can be used as study flash cards or can be used to supplement the EMS CHALLENGE™ board game (#EMS-GAME).

#IV-CARDS

LIFE/FORM® CHEST TUBE MANIKIN

Comprehensive training to practice pre-hospital chest trauma management, as well as ongoing chest tube maintenance. Cut-away viewing for visual anatomy check, with detailed musculature, ribs, and lungs. Features pressurized pneumothorax site and pleural effusion site. Includes five replaceable chest tube sites, five pneumothorax chest pads, and carrying case. Does not include chest tubes or drainage system. Three-year warranty.

#CMT3770

PETER PICC LINE

The rapid acceptance and use of Peripherally Inserted Central Catheter (PICC) means it's essential that staff members can competently perform this important technique. You can teach the skills needed for sterile set up and insertion of the PICC line with this portable, lightweight teaching model. Features anatomically correct partial upper torso, superior vena cava, subclavian, jugular, median basilic, basilic and cephalic veins.

The moveable chin simulates the occlusion of the jugular vein which can prevent the PICC from taking this path. Palpable ribs allow students to practice measuring proper catheter length and confirming proper placement of the distal tip of the catheter in the superior vena cava.

Standard IV catheter placement is also possible in the major veins, which are barely visible through the translucent arm skin. Durable construction includes muscle tissue, arm and body skin, arm vein and body vein set. Comes complete with fluid bag (with tubing) in a durable, soft-sided cloth carrying case. 12 lbs.

#VA600

Features realistic flashback and an extensive venipuncture and intramuscular system

3-YEAR WARRANTY

LIFE/form® ADVANCED VENIPUNCTURE/INJECTION ARM

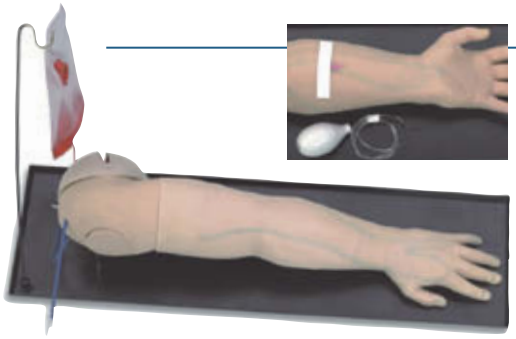
A revolutionary training arm that provides complete venous access for IV therapy and phlebotomy—plus sites for intramuscular and intradermal injections. An extensive 8-line vascular system allows students to practice venipuncture at all primary and secondary locations: Basilic V., Dorsal Metacarpal V., Median Basilic V., Cephalic V., Digital V.

This highly realistic training arm features soft, lifelike skin, rotating wrist, natural bony landmarks, and flexible fingers (with fingerprints). The replaceable skin rolls as the veins are palpated, and a discernible 'pop' is felt when entering the veins. This training arm can sustain hundreds of injections (normal use) before skin or veins need to be replaced. Includes 2 qts 'blood,' 3cc syringe, 12cc syringe, needle, two fluid bags, instruction manual, and carrying case. Three-year warranty.

#IV1121

#IV1126 (dark skin)

#LF01122U Replacement vein and skin



Students have accessto antecubital basilic and cephalic sites, as well as the dorsal metacarpal veins.

DELUXE IV TRAINING ARM

This full-arm trainer provides unlimited access to the major veins in the arms and hands, as well as a deltoid IM injection site. Features include antecubital, basilic and cephalic sites, and dorsal metacarpal veins, allowing students to practice a variety of procedures. Includes blood reservoirs and simulated blood. Replacement skin, veins, and injection site available. Tubing contains latex. Three-year warranty.

#IV120

#390 Replacement skin

IV ARM AND HAND

For detailed venipuncture practice. Give students detailed exercises in venipuncture and IVs with these realistic models. Features include durable lifelike vein roll-over, palpable veins, and a characteristic pop when needle penetrates vein. Carry tray and simulated blood included. Veins contain latex. Three-year warranty.

#IV146 IV Training Arm

#IV147R IV Training Hand (right; left hands available)

CHESTER CHEST WITH NEW ADVANCED ARM

Allows healthcare professionals to practice and master the use of most common types of vascular access devices, implanted ports, central venous catheters, and peripherally inserted central catheters. Students can also practice fluid infusion and withdrawal and dressing care. Offers dramatically realistic 'human tissue', and includes three inserts for creating difficult access scenarios. Add: The new advanced arm now has a dual lumen 5FR PICC exiting the basilic vein from the inner bicep area. Posterior to the PICC insertion site is a recessed area for the placement of the optional peripheral port (#NUR-VA417). An additional feature of the new arm is a pre-positioned 20g IV catheter in the forearm which is attached to a simulated "blood" reservoir bag to permit practice of "blood" withdrawal and fluid infusion. This is a complete unit consisting of a life-sized torso with neck and chin, advanced detachable arm, Outer Tissue Flap, three Difficult Accessing Inserts, an actual implanted port, CVC, PICC, openings for attachment of a subclavian or external jugular catheter, "blood" reservoir bags, tubing, talc baby powder and user's information. Six-month warranty.

#VA2400

#VA2386 Advanced arm (replacement for VA400P, older model)

#VA501 Optional carrying case

#VA405 Outer tissue flap

#VA406 Generic port

#VA407 Central venous catheter

#VA408 PICC line

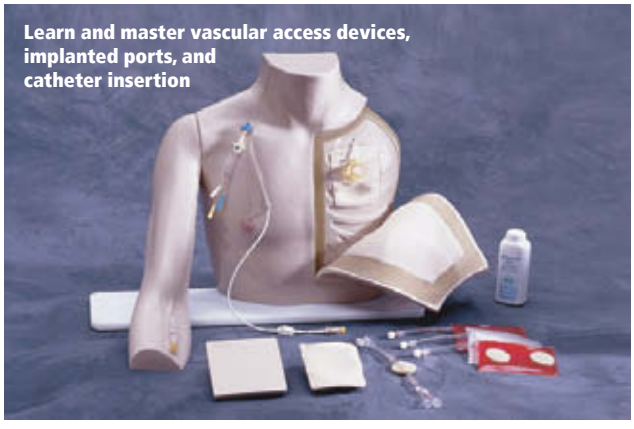
#VA417 Optional peripheral port

#VA420 Difficult Accessing Insert (simulates feel of shifting port)

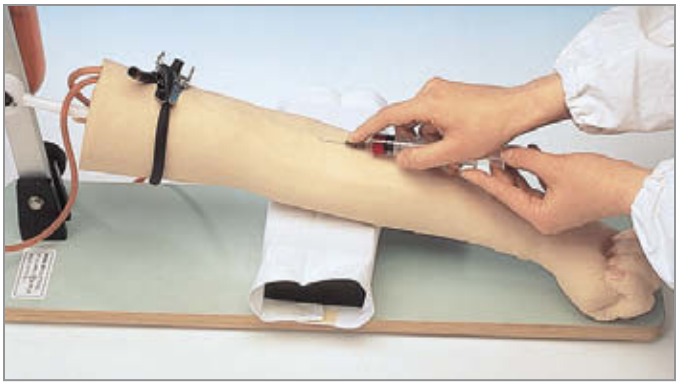
#VA430 Difficult Accessing Insert (simulates feel of properly placed port on upper portion, or tipping port on lower)

#VA440 Difficult Accessing Insert (simulates deeply placed device)

#VA415 Standard arm



Learn and master vascular access devices, implanted ports, and catheter insertion



INJECTION & BLOOD SAMPLING PRACTICE MODEL TYPE 1

A series of techniques such as confirmation of injection site, insertion hypodermic needle and injection of medicine are possible with this model. The pressurized blood vessel can be palpated, and needle insertion provides a feeling similar to that offered by a real human arm. Other features include:

- Realistic skin.
- The artificial blood features the same viscosity and color as an actual human body.
- The skin conceals injection marks well, even after numerous practices.
- Needle injection has the same feel as a human patient, giving the student realistic practice.
- Easy exchange of both the skin and veins.

The arm includes a blood vessel tube, an irrigator, simulated blood, an elbow rest, a stand, and carrying case.

#LM-028

LIFE/form® ADVANCED HAND

The ideal simulator for advanced IV training! Now, for the first time, Life/form® realism is available in an injectable hand simulator. The dorsal surface of the incredibly realistic hand includes injectable metacarpal, digital, and thumb veins. The soft, flexible fingers are molded separately with extreme attention to detail… right down to the fingerprints! Students have the opportunity to develop important manipulation skills provided by the flexion of the wrist. The skin rolls as you palpate the veins, and you'll feel the characteristic "pop" when the vein is entered. The simulated veins and skin are completely replaceable, allowing you to keep your Advanced IV Hand working and looking like new. Under normal use, hundreds of injections may be performed before the veins or skin need to be replaced.

#IV1139

#IV1146 (dark skin)

Laerdal®
helping save lives

MULTI-VENOUS IV TRAINING ARM KIT

This lifelike training arm provides a multi-vein system designed for peripheral intravenous therapy. Students can practice venipuncture in the antecubital fossa or dorsum of the hand. Other training features include:

- Rotation at deltoid for easier access during peripheral IV line insertion and removal
- Accessible median, basilic, and cephalic veins
- Palpable veins enable site selection and preparation

Other features are: infusible veins allowing peripheral therapy with IV bolus or push injection method; intermittent infusion device insertion practice; assessment and rotation of site and dressing, including (latex) tubing change; and a replaceable cost-effective skin and vein system. All kits include an arm, replacement skin and multi vein system, simulated blood, blood bag with tubing and connector, clamp and hook, 5 syringes, manikin lubricant, carry case and directions for use. One-year warranty.

LIFE/form® VENATECH IV TRAINER

This patented IV trainer is so economical because each student can have their own for venipuncture practice which means no more precious class time wasted waiting for their turn! This IV trainer is easily attached to a person's arm so the student can practice venipuncture techniques on a live subject, including the proper positioning on an actual human arm, without the risks associated with puncturing living tissue. The trainer includes the three main veins used in phlebotomy - cephalic, basilic, and median cubital - all in correct anatomical position. An arterial vessel is present on the trainer for arterial blood gas simulation, and can also be used as a tool for showing how to correct the puncture through a vein into an artery. Besides performing actual IV practice, the trainer helps students learn essential patient communication skills such as explaining the procedure to the patient, asking them to close their fist, etc.

#IV1162 (white)

#IV1163 (black)

#IV1175 (clear)

ADVANCED VENIPUNCTURE TRAINING AID

Used by many hospitals and home health agencies. Your patients' veins aren't all one size, so why not offer them a trainer that will better reflect real-life venipuncture scenarios? This advanced aid permits the injection of fluids and drawing blood, with practice on the more difficult task of working with smaller veins.

Features four barely discernible veins in three diameters, with a fourth, deeply-placed vein hidden in a semi-transparent material. Students will feel a pop as the needle enters the vein, followed by a realistic flashback of simulated blood confirming proper needle placement. Made of latex-free Dermalike material that allows more needle sticks without tearing, and 50% less needle drag when puncturing.

#VA1365

#VA375 Carry case

#VA491 Stain-resistant simulated blood (1 qt)

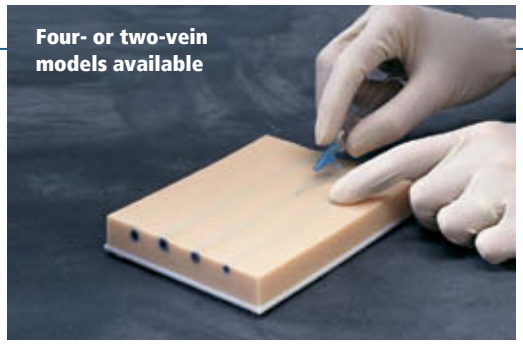
GERIATRIC IV TRAINING ARM

Developed from a live cast, this arm is unique to the industry. Features include veins that roll away or disappear as students attempt to catheterize the vessel, and exceptionally realistic thin skin that authentically replicates the skin texture of an older patient. The perfect addition to geriatric IV and rescue training. Includes two IV reservoir bags, one pack of simulated blood powder, and durable carrying bag. Three-year warranty.

#IV610

#RP144 Additional reservoir bag

#RP225 Additional simulated blood powder



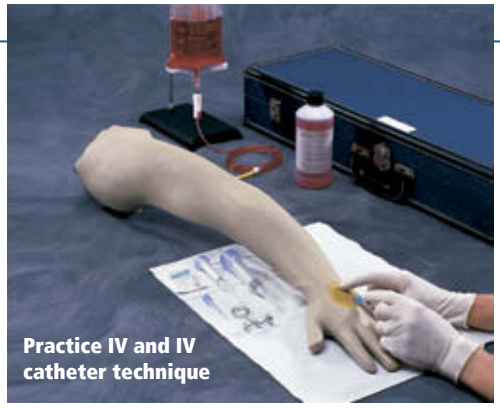
VENIPUNCTURE TRAINING AID

A unique training aid that provides realistic venipuncture training, including practice of the new no stick IV access devices. The model displays barely discernible blue veins, partially hidden in a semi-transparent, tissue-like material. When accessing, the skin rolls realistically and students hear a pop as the needle is inserted. Proper placement is confirmed by drawing back on the syringe. If the tip has either not been advanced far enough or advanced too far, students will feel resistance which allows them to perfect their technique.

Both the four- and two-vein model offer veins in a variety of diameters for creating realistic training. Made of latex-free Dermalike material that allows more needle sticks without tearing, and 50% less needle drag when puncturing.

#VA354

#VA352 Two veins



ADULT INJECTABLE TRAINING ARM

Ideal for perfecting venipuncture and injection techniques, including starting IVs and introducing IV catheters. Elegant construction and fine detail (right down to fingerprints). Realistic training includes skin that rolls as you palpate and a pop students can feel as the needle penetrates the vein. Veins are accessible at the antecubital fossa, along the forearm, and at the back of the hand, allowing for venipuncture at common sites, as well as realistic intramuscular injection practice.

Replaceable skins and veins. Aerosol sealant is available to seal punctures in the tubing and prevent leakage. Includes Life/form Arm with white skin, blood donor set, infusion set, 3 cc syringe, 12 cc syringe, needle, 1 pint simulated blood, teaching guide, and hard carrying case. African American models available. Three-year warranty.

#IV997 (dark skin)

#RP966 Skin/vein replacement kit

LIFE/form® INTRAOSSEOUS INFUSION SIMULATOR

The Life/form® Intraosseous Infusion Simulator is a dramatic and exciting training aid designed to demonstrate and simulate the intraosseous infusion procedure. Students will be able to learn and practice, with incredible accuracy and realism, a procedure which has been difficult to simulate in the past. Prior to the Intraosseous Infusion Simulator, educators resorted to unsanitary chicken and turkey bones. PALS programs will find this teaching aid a convenient and sanitary alternative.This simulator is also very cost-effective due to replacement bones and skins which extend the life of the simulator indefinitely. Use a 15-gauge needle during simulation. The bones used in the model have been designed with four sides, each side having the ability to be punctured several times. In addition, three palpable landmarks, including patella, tibia, and tibial tuberosity are located in both legs. Both legs have also been designed so that aspiration is possible. Life/form® Intraosseous Infusion Simulator represents a six-month-old infant. Included with the simulator are 10 replaceable bone inserts, 2 sets of replacement leg skins, 2 white towelettes, syringe with tubing, blood powder, sealing wax, 1/2 oz. liquid lubricant, mixing bottle, needle, and hard carrying case. Three-year warranty.

INFANT INTRAOSSEOUS LEG

Laerdal helping save lives

Lifelike reproduction designed for training students in infant intraosseousinfusion techniques. Features include:

- Intraosseous needle insertion
- Aspiration of simulated bone marrow
- Replaceable latex pads prefilled with simulated bone marrow
- One-year warranty

Features replaceable pads prefilled with simulated bone marrow

#080015

#082305 Latex leg replacement pads (5 pk)

LIFE/form® PEDIATRIC IV LEG

A special, extremely thin, synthetic skin is paired with rubber tubing featuring a small lumen and thin walls. The greater and lesser saphenous veins are accessible, as well as the dorsal venous arch on the foot. Comes with two IV bags with clamps, one pint Life/form® blood, one 3 cc syringe, one 22-gauge needle, a winged infusion set and a three-year warranty.

#IV3636

LIFE/form® PEDIATRIC IV ARM

A special, extremely thin, synthetic skin, and rubber tubing with appropriately small lumen and thin walls. The cephalic and basilic vein are accessible, as well as the dorsal venous arch on the hand. Includes two IV bags with clamps, one pint Life/form® blood, and winged infusion set. Three-year warranty.
Size: 8" x 5" x 5".

#IV3637

PEDIATRIC INJECTABLE TRAINING ARM

Soft foam construction accurately simulates the deltoid muscle and allows students to better prepare for administering intramuscular injections to children. Simulated bone in the shoulder defines and limits the injection area. Water may be used as an injection fluid in the shoulder area. Includes a Life/Form Arm, fluid supply bag, 3 cc syringe, 1 pint simulated blood, teaching guide, and hard carrying case. Three-year warranty.

#IV958

#RP986 Skin/vein replacement kit

LIFE/form® DIABETIC INJECTION PAD

This pad has the look and feel of human skin which makes it ideal for diabetic instruction and injection practice. May be worn on the body in specific locations (stomach, thigh, upper arm) to allow patients to inject fluid into the pad to practice giving themselves injections. Pad is thick enough to accept all insulin needles. For safety purposes, the 6-1/4"L x 4-1/2"W x 3/4"D oval pad has a hard plastic backing to prevent the needle from poking through the pad and into the wearer's skin. Has a 1" wide nylon strap with an adjustable plastic buckle.

LIFE/form® INTRAMUSCULAR INJECTION SIMULATOR

Here is the perfect volunteer for training your beginning health care students to administer intramuscular injections. Always available for class demonstrations or practice by groups of 1 to 30, the Life//form® Intramuscular Injection Simulator offers both visual and tactile learning.

A simulated bony structure is embedded in the torso and represents the superior end of the femur, or greater trochanter, the posterior superior and anterior superior iliac spines, and the sacrum. The bony structure provides palpable anatomical landmarks so students can identify proper injection sites.

A section of the upper, outer quadrant of the left gluteal area is cut away to allow students to visualize the underlying structures. The gluteus medius and gluteus maximus muscles, sciatic nerve, and vascular structures are clearly shown.

Three types of intramuscular injections can be taught and practiced on this simulator: dorsogluteal, ventrogluteal, and vastus lateralis injections. As with all Life/form® replicas and simulators, the Intramuscular Injection Simulator is extremely realistic. Skin and muscle textures, as well as bone shape and position, closely resemble a live patient. As a result, perforation of the tissue with a needle duplicates the sensation of administering an actual injection. Life/form® Intramuscular Injection Simulator comes complete with teaching guide, supply of syringes, a hard carrying case, and a three-year warranty.

#IS961

GLUTEAL INTRAMUSCULAR INJECTION MODEL

This model includes a series of techniques such as needle insertion and drug solution injection.

Characteristics:

- Internal alarm alerts when incorrect region is injected.
- Realistic practice reduces the anxiety students may have during clinical practice.
- Syringe infusion can be performed.
- Realistic needle placement.
- The injection site and skin can be easily replaced.

Injection Sites:

- The correct injection site is located near the center of the upper right quadrant and 1/3 the distance from the iliac crest.
- The correct injection sphere is 5 cm in diameter, which is the approximation of the subcutaneous panniculus adiposus, and the panniculus.
- The iliac crest, iliac spine, anterior superior iliac spine, anterior inferior iliac spine, trochanter major and pubic bone can be palpated.

This model includes the AC adapter, drainage tube, and carrying case. One-year warranty.

#LM-027

LIFE/form® INTRADERMAL INJECTION SIMULATOR

Now your students can practice intradermal injections safely and conveniently with the Life/form® Intradermal Injection Simulator. The unit consists of a casting molded from a real forearm from the wrist to just below the elbow. Life/form® vinyl skin provides realistic feel and appearance to ensure a realistic training experience. The arm features eight sites for practicing intracutaneous injections. If fluid is properly injected, a characteristic skin welt will form. The welt is removed by withdrawing the fluid after practice. Each site is reusable by dozens of students. Life/form® Intradermal Injection Simulator includes an arm section with eight injection sites, sealant, syringe, teaching guide, a storage box and a three-year warranty. Size: 13" x 11" x 5"

#IS1008

LIFE/form® VENATECH IM & SUBQ SIMULATOR

An innovative yet affordable simulator that is realistic in nature, with a chance for aspiration. Because there is fluid in vessels deep within the simulated tissue, there is an actual possibility of seeing simulated blood in the hub of the needle on aspiration. Students will be able to use critical thinking skills they have learned through didactic training and put those skills to use in a clinical simulation. The device fits on the area of the deltoid muscle as well as the vastus lateralis, rectus femoris, ventrogluteal, and dorsogluteal areas for realism. Pad measures 6" x 3" x 1". Three-year warranty.

#IS1184

#IS1185 (dark skin)

LIFE/form® PORTABLE IV TRAINER

The economical Life/form® Portable IV Training Hand or Arm combines realism, fine detail, and lightweight convenience in a single trainer. This self-contained trainer is packaged in a plastic case that can be converted into a work station. Trainer includes everything you will need to begin training and practicing IV skills. The Life/form® Portable IV Trainer is constructed of soft material with life-like veins in the skin surface that are visible and palpable. Veins are accessible at the back of the hand, making it possible to practice venipuncture at any of the common sites. When puncturing through the vinyl skin and veins, the skin will actually roll as you palpate the veins and the characteristic "pop" can be felt as the needle penetrates the vein. These trainers are the ideal way to teach venipuncture techniques including starting IVs and introducing Over the Needle IV catheters, and a realistic flashback will be observed when the needle has been accurately inserted into the vein. This trainer is inexpensive enough so that each student can have their own hand to practice technique and skills required in their courses. Under normal use, hundreds of injections may be performed. The skins and veins cannot be changed (trainer will eventually need to be replaced). Included with each trainer is two IV bags, packet of blood powder and spoon, base with stand, two pinch clamps, 3 cc syringe, 12 cc syringe, 12 gauge needle, a winged infusion set, and a plastic clamshell case to store and transport the trainer and components.

#IV700 IV Hand Trainer

#IV701 IV Arm Trainer

AIRSIM

TRUCORP AIRSIM ADVANCE

Raise the bar on the realism of your training.

AirSim Advance features an anatomically accurate nasal passage, inflatable tongue to increase difficulty of airway and an option to include "breakout teeth" to simulate the effects of bad practice in laryngoscopy.

The AirSim Advance features the uniquely constructed AirSim airway, designed to provide true, anatomically correct and visually accurate internal features.

The addition of a "real-feel" skin covering provides a more realistic bag mask ventilation training experience. AirSim Advance features an improved neck design allowing for accurate articulation.

AirSim Advance is ideal for training in:

- Effective bag mask ventilation
- Use of full range of supraglottic devices
- Video and standard laryngoscopy
- Tracheal and naso-tracheal intubation
- Awake fiber-optic examination

All AirSims are shipped with a "lung", a CD-ROM containing a product manual and a video of insertion techniques. Products are contained in a lightweight canvas carry case and are covered with a one-year warranty with extended terms available on request.

Trucorp recommends the following equipment sizes for optimal performance:
7.0-7.5 mm ID for nasal intubation
8.0-9.0 mm ID for oral intubation
Size 3 and 4 for LMA laryngeal masks
(similar respective sizes for other supreglottic devices)
Size 35F–37F for endobronchial tubes

RESPITRAINER ADVANCE WITH QUICKLUNG

The RespiTrainer Advance puts [illegible] your patient's airway and lungs with instant feedback to your [illegible] or laptop. RespiTrainer combines IngMar Medical's QuickLung with the unparalleled fidelity of TruCorp's AirSim Advance head and airway design to truly prepare you for real life scenarios. EMS and respiratory care training can use this for education and competency testing in:

Bag-mask ventilation and head positioning, LMA and ET-tube insertion, use of full range of superglottic devices, video and standard laryngoscopy, tracheal & naso-tracheal intubation. Features include:

- Performance feedback system with adjustable test lung
- Uniquely constructed airway for anatomically correct and visually accurate internal features
- Inflatable tongue to increase the difficulty of the airway
- Anatomically correct naso, oro, and laryngopharynx
- Neck design allows for accurate articula
- "Real-feel" skin covering for a more realistic bag-mask ventilation training experience

QUICKLUNG

Achieve a higher level of patient care and safety with the most realistic and ventilator-friendly test lung available today! Features include:

- Easy set-up: Compact 8.5" x 11" footprint. Works accurately from a table or suspended above ventilator.
- Ventilator triggering: Check ventilator response to patient respiratory efforts by lifting the QuickLung bellows panels. Simulates a physiologically correct (negative pressure) respiratory effort, unlike bladder-style test lungs that require a positive pressure "squeeze" to achieve an uncontrolled negative pressure rebound.
- Regulatory compliance: Easily adjustable parabolic resistance and compliance settings correspond to IEC 60601-212 ventilator performance standards.
- Durable: Robust components include bellows system of durable Hypalon® with wire-reinforced convolutions and enclosure of lightweight metal alloy.
- Compatible with all ventilators, from ICU to transport and combine with any flow/volume/ pressure analyzer for a complete ventilator testing system.

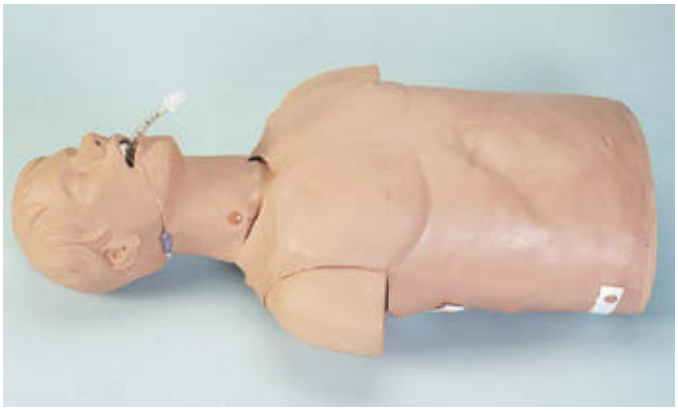
Includes carrying bag.

#1500100

AMBU® TUBECHEK™

This easy-to-use, disposable tool verifies proper ET tube placement and takes advantage of anatomical differences between the trachea and the esophagus. It's durable and reliable – even in cardiac arrest. Features include fast, immediate results; no calibration; and no risk of ventilating stomach. Glows in the dark for use in low-light conditions; long shelf life.

#TUBE-01 Syringe style
#TUBE-02 Bulb style



ADULT AIRWAY MANAGEMENT TRAINER TORSO

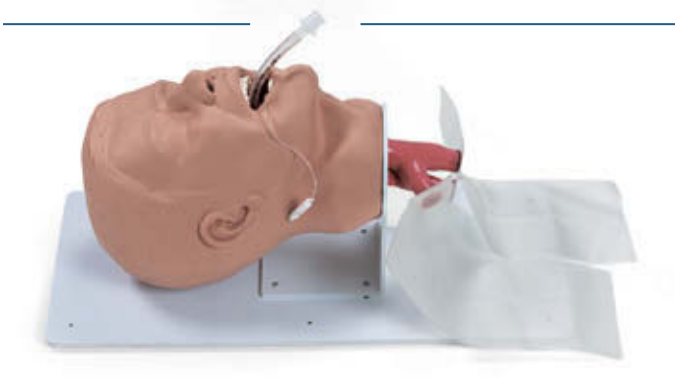
This full-size torso features anatomical landmarks including sternum, rib cage, and substernal notch. This trainer has teeth, uvula, vocal chords, glottis, epiglottis, larynx, arytenoids cartilage, esophagus, inflatable lungs, stomach, and trachea. Students can practice intubation on the oral and nasal airway, n.g. tube placement, and bag valve mask ventilation. Includes durable soft carrying bag. 27" x 17" x 10"; One-year warranty;14 lbs.

#AMT086

ADULT AIRWAY MANAGEMENT TRAINER

Realistic practice is the key to developing true proficiency in airway management. This lifelike upper torso and head simulates real-world complications including the Sellick Maneuver, handling laryngospasm, clearing an obstructed airway, suctioning liquid foreign matter, visual inspection of lung expansion, stomach inflation, and vomiting situation. Can be used with Combitubes and Laryngeal Mask Airway. Includes the Airway Demonstration Model, cleaning kit, lubricant, carrying case, and instructions. 10" x 18" x 30"; One-year warranty; 35 lbs.

#25000033 Airway Management Trainer
#252500 Airway Demonstration Model
#252800 Simulated vomit
#252090 Airway lubricant



ECONOMY ADULT TRAINER

This detailed adult intubation head comes mounted for advanced airway management training. Students can learn head/neck anatomy, endotracheal intubation, and nasotracheal intubation. Use of field emergency airway adjunct tubes like LMAs and Combitube, securing, and suctioning, and maintenance of the installation can all be practiced with this unit. Includes convenient soft carrying bag, lubricant, and instructions. 21" x 9" x 10"; Three-year warranty; 10 lbs.

#AMT500

AMBU® INTUBATION TRAINER

This affordable trainer offers accurate anatomy including mouth, nostrils, teeth, tongue, pharnyx, epiglottis, vocal chords, trachea, esophagus, and lungs. Features also include realistic head tilt and spine movement. Acoustic signals help students correct mistakes. Use with LMA and CombiTube (page 75). Includes soft case. One-year warranty.

#186-000

PEDIATRIC TRAINERS THAT PROVIDE REALISM…

INFANT AIRWAY MANAGEMENT TRAINER

The Laerdal Infant Airway Management Trainer provides the realistic anatomy of a 3-month-old infant for teaching and practicing basic and advanced airway management skills. The realism is further enhanced by the elasticity of the new unique tissue and skin material. Other features include:

- Lifelike anatomy of the tongue, oropharynx, epiglottis, larynx, vocal cords and trachea
- Bag-Valve Mask ventilation
- Sellick Maneuver
- Intubation (oral and nasal)
- Laryngeal Mask Airway (LMA)
- Realistic tissue simulation
- Correct tube placement can be checked by practical inflation test
- Simulated stomach inflation

Includes airway lubricant and instructions. One-year warranty.

#250-00250

NEONATAL INTUBATION TRAINER

Practice intubation skills on this newborn baby. Robust and realistic, this model allows students to acquire skills that are essential in a clinical setting:

- Oral and nasal intubation
- Bag-valve-mask ventilation
- Checking for correct tube placement with practical inflation tests

Includes lubricant and directions. Lungs contain latex.

#250-00101

#252090 Airway lubricant

CHILD/INFANT AIRWAY

A convenient combination for pediatric and infant airway management training. These detailed trainers are designed to teach oral and nasal endotracheal intubation procedures on children and infants. Anatomy features include: teeth, uvula, vocal chords, glottis, epiglottis, larynx, arytenoid cartilage, trachea, esophagus, and inflatable lungs and stomach. Mounted on practice boards for easy class use. Includes a sturdy nylon bag and lubricant.

#LBG120 Infant replacement lung/stomach (3 pk)

AMBU® LARYNGEAL MASK

Provides safety and convenience in a sterile, single-use design. The unique curved airway tube replicates human anatomy and a reinforced tip ensures correct placement. The cuff and airway tube are a single-unit, with smooth sides, and the ultra thin pilot balloon provides precise tactile indication of intubation. The extra soft cuff is 0.4mm thick to ensure the best possible seal with the least amount of intra-cuff pressure. Packaged in individual sterile peel-packs. Connector is 15mm; maximum intra-cuff pressure is 60cm H20. Kit includes mask, syringe, and lubricant. For training and real rescue.

#LM3211K (KIT) Size 1, 0-11 lbs, Max. Cuff infl. vol-4ml

COMPLETE LIFE/form® AUSCULTATION TRAINING STATION

Now there is an even better way to teach and learn auscultation skills! Included with the Life/form® Auscultation Trainer and SmartScope™ (#NUR-AUS1142), the Auscultation Practice Board guides students through the transition from anatomical drawings to a three-dimensional torso. Using the same technology as the Auscultation Trainer, the Anterior Auscultation Practice Board (#NUR-AUS1190) will cause the SmartScope™ to emit various sounds dependent on the location of the stethoscope. Amplifier/Speaker System included.
Three-year warranty.

#AUS1191

#AUS1200 AUS1191 plus the AUS1199

POSTERIOR AUSCULTATION PRACTICE BOARD ONLY

The Auscultation Board can be used by itself or added as an option to enhance the auscultation training station. Features 12 posterior lung locations: six upper posterior, four lower posterior, and two mid-auxiliary. Includes 16" x 20" posterior board (no case), adhesive patches to attach to case if desired, and vinyl carry case, easel, and instructions. Smartscope and remote control not included.

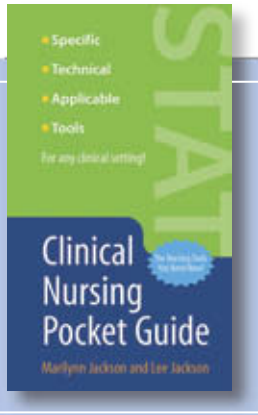
CLINICAL NURSE POCKET GUIDE

Convenient and handy, this pocket guide has all the information a clinical nurse would need at their finger tips.

See page 56 for more details.



AUSCULTATION TRAINER & SMARTSCOPE™

The instructor selects from a menu of heart and lung conditions by wireless remote control. The manikin presents itself as a real patient without visible auscultation sites. The student must palpate to identify correct auscultation locations, and will hear different heart and lung sounds as the Smartscope™ is moved to different locations on the manikin. A diagnosis of the condition selected by the instructor can be made by comparing the variations in sounds occurring at different sites. Just like a real patient!

Lung Conditions to Select with the Remote: Bronchovesicular, Bronchial, Cavernous, Coarse Crackle, Egophony, Fine Crackle, Friction Rub, Infant, Mono Wheeze, Normal Lung, Pectoriloquy, Pulmonary Edema, Rhonch, Stridor, Vesicular, and Wheeze.

Heart Conditions to Select with Remote: Aortic Regurgitation, Atrial Septal Defect, Holosystolic, Midsystolic, Mitral Stenosis, Normal, PDA, Pulmonary, Stenosis, S3 Gallup, S4 Gallup, Systolic Click, and VSD.

Lung sounds can be detected at five anterior, 10 posterior, and two midaxillary locations. Students can practice auscultation at six anterior heart sites. The remote control does not have to be pointed directly at the manikin or SmartScope™ to operate. One remote control will operate multiple sets of SmartScopes™ and/or manikins simultaneously. Great for group instruction. Listen to the sounds by either using headpieces on SmartScope™ or by connecting to an amplifier/speaker (not included). Range on the unit is up to 100 ft. of remote access. Includes manikin, one remote control with LCD display, and one SmartScope™ with single- and dual-user headpieces, and hard storage case. Operates using two "AA" and two "AAA" batteries (included). Three-year warranty.

#AUS1142

#AUS1190 Anterior Auscultation Practice Board w/ case only

#AMP2014 Amplifier/Speaker (10-watt and AC power cord)

LIFE/form® DELUXE BLOOD PRESSURE SIMULATOR WITH SPEAKER SYSTEM

This lifelike simulator allows the presetting of values for both systolic and diastolic pressures. Provides an excellent means to practice listening to and distinguishing blood pressure sounds prior to actual clinical experience. It is possible to audibly discern the five Korotkoff phases. Many times when working with a live subject, pressures are difficult to auscultate, making accurate evaluation of student proficiency almost impossible, and undermining the student's self-confidence. With this realistic unit, the student can find the preset results and the instructor can unfailingly know if the student has performed the procedure accurately. The electronically generated sounds are digitally recorded.

Control Unit Allows Instructor to:

- Select systolic and diastolic settings
- Adjust pulse rate
- Adjust Volume
- Turn ausculatory gap on or off
- Easily calibrate unit for use with any sphygmomanometer

Students:

- Use normal procedure to place cuff on arm
- Check palpable pulse at the radial site
- Pump cuff
- Pressures are activated at release valve
- Read pressures on sphygmomanometer
- Auscultate Korotkoff sounds with any stethoscope through a speaker in the arm

Includes blood pressure simulator and amplifier speaker system. Three-year warranty.

#BP1129

BLOOD PRESSURE TRAINING ARM

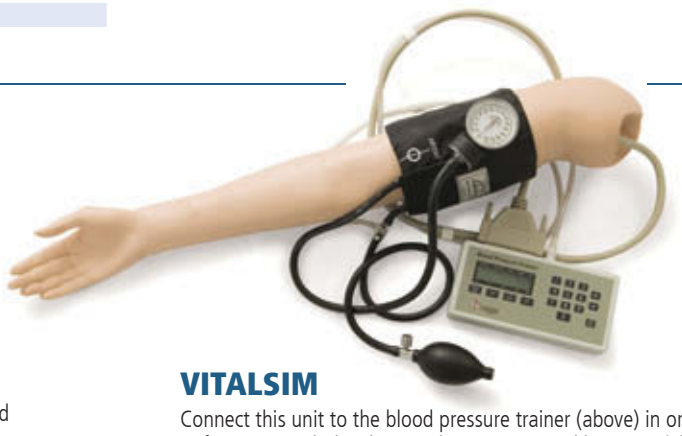
Lifelike adult arm with electronic trainer designed for training procedure of NIBP (non-invasive blood pressure) measurement.

Features include:

- Palpable brachial and radial pulse
- LCD guided operation
- Systolic, diastolic, heart rate and auscultatory gap are programmable
- Representation of both systolic and diastolic pressures
- Indication of gauge reading as pressure is increased or decreased
- Adjustable volume

This training arm includes an adult arm, blood pressure trainer, cuff, 2 'AA' batteries, trainer controller and carrying case.

#375-40501



VITALSIM

Connect this unit to the blood pressure trainer (above) in order for the trainer to function. Includes the unit, battery case and batteries (6), remote control with batteries (4), cable, USB cable for connection to PC, AC adapter, software CD, carrying case, and directions for use.

#200-10001

BREAST CANCER TRAINING MODEL

This breast cancer training model was developed so that knowledge of typical cancer conditions can be acquired by inspection and by palpation of the organ on the basis of the symptoms of breast cancers at various stages. Most breast cancers are detected by a palpation of a lump. The smaller the cancer, the more readily it heals after treatment.

This model will demonstrate not only lumps but also dimples, swelling of the lymphonodi axillares, depression to the nipple, and changes to the skin. Includes a storage case.

#LM-018

BREAST CARE FLIP CHART

Find out the facts about breast cancer, mammography, and BSE with this educational flip chart. Text on the back of six full-color panels helps the instructor give a clear presentation. Measures 12" x 17".

#NUR2739

BREAST SELF-EXAM FORM

A lifelike teaching form made from BIOLIKE 2™ synthetic tissue which is also used to make breast prostheses. The form is embedded with five simulated tumors illustrating different types of common lumps in the breast. A form may be examined while held over the woman's breast, or while it lies in its carrying case. The form's skinlike feel to the touch is almost magical, but it is durable and may be washed with soap and water. Includes carrying case.

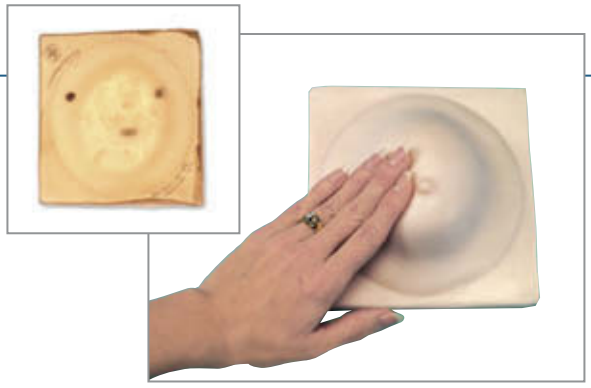
#NUR1313

HEAVY-DUTY BREAST SELF-EXAMINATION MODEL

A durable breast self-examination model that uses the "teach by touch" method so women can learn the feel of five different lumps simulated to duplicate real tumors. Women can feel the model in their hands or over their own breast. Washable with soap and water. Includes a permanent cover for high volume use. Complete with carrying case. Measures 6" L x 4" W.

#NUR1491

Have a question about an item?
Not sure what you need?
Call our experienced Customer Service Team: (888) 322-8350.



BREAST MODEL WITH TRANSLUCENT BASE

This BSE model is the most lifelike educational form available, containing different-sized lumps. It has a unique translucent base to help women discover the exact location of lumps in a simple and easy manner. Also, unlike many other models, there is no need to use powder or wash your hands after use due to oiliness. 6" x 6 1/2" x 2 1/2".

#NUR2990

BREAST MODEL WITH INTERCHANGEABLE NODULES

This educational model comes with five different-sized lumps that can be inserted and removed from the back of the breast. Perfect for mammography and BSE motivation. Includes a carrying case and extra set of breast lumps.

#NUR3327

FIBROCYSTIC BREAST MODEL

Benign cysts are often mistaken for malignant tumors. This model has multiple lumps to simulate a fibrocystic condition. Comes with slip-on cover and carrying case.

#NUR3328

A-B-C BREAST EXAMINATION SET

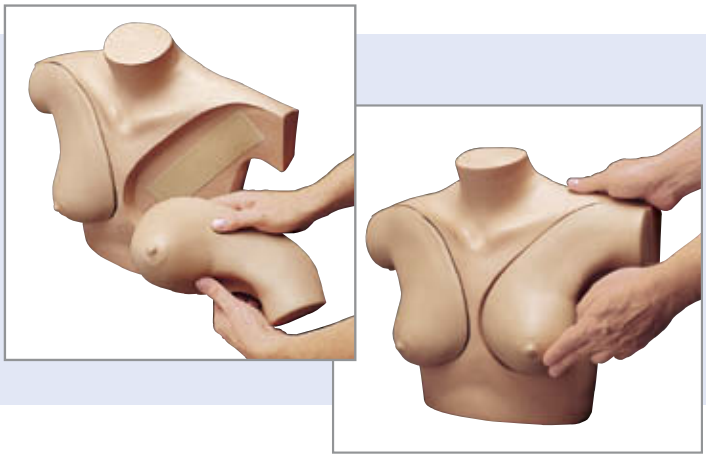
Teaching models available in three different breast (cup) sizes, because all women are not the same. The set includes small (5 oz.), medium (9 oz.), and large (28 oz.) models. Each model contains five lumps which, just as in real life, are more difficult to detect in larger breasts than in the smaller breasts. Each model is washable with soap and water. A must for any comprehensive teaching program. Includes carrying case.

#NUR4912

BREAST SELF-EXAMINATIONS SIMULATOR

Health care professionals are elated with this simulator's realism, durability, and texture. Makes teaching easy: the BSE simulator may be used in either the vertical or reclining position. Each breast may be detached from the simulator. One breast has nine lumps from 2mm to 25mm in diameter. Abnormal breast includes two lumps beneath the arm. Three lumps may be palpated easily; six are extremely subtle. Teach the spiral or grid pattern to improve detection techniques. Helps stress the need for monthly self-examination and encourages the recording of results and prompt reporting of any unusual findings to a health care professional. Includes an instruction manual and carrying bag.

#NUR3286



LIFE/form® FEMALE CATHETERIZATION SIMULATOR

The Female Catheterization Simulator is constructed with a bladder reservoir, patient urethra, and a valve simulating the internal urethral sphincter. The normal feeling of resistance and pressure will be experienced as a catheter is passed through the urethra, past the sphincter, and into the bladder. When the catheter enters the bladder, artificial urine (water) will flow from the catheter as it would with a real patient. This simulator is the torso of a middle-aged woman with thighs abducted for proper position during catheterization. The external genitalia and perineum are molded in lifelike form. The labia minora can be spread apart naturally to reveal the clitoris, urethral opening, and vaginal introitus. Life/form® Female Catheterization Simulator includes a hard carrying case, lubricant, catheter, teaching guide and three-year warranty.

NOTE: A Foley catheter (#NUR-RP1127) can be used if extreme care is taken to inflate the cuff only when it is in the proper position. Just as in a real patient, the cuff must be completely deflated before the catheter is removed. Improper use of a Foley can result in damage to the simulator, just as when using a Foley catheter with a real patient.

#NUR856

#NUR985 Lubricant kit

#RP1127 Foley Catheter (1 each)

#RP1128 Foley Catheter (10 pk)

Don't forget the lubricant kit, #NUR985

SAME-DAY SHIPPING! (on in-stock items)
Just place your order by 3 PM CST, Monday through Friday.

URETHRAL CATHETERIZATION MODEL

With this simulator catheterization can be practiced as if it is a real patient. The genitalia and urethra simulate anatomical structure precisely. When a catheter is inserted through the urethra, and enters the bladder, artificial urine (water) will flow from the catheter. The residual urine will be confirmed by pressing on the bladder. In addition, the turgescence of the bladder can be recognized by palpation, and the trainee can practice this assessment. Includes a storage bag.

#LM-061

LIFE/form® MALE CATHETERIZATION SIMULATOR

With the Life/form® Male Catheterization Simulator, catheterization can be practiced just as on a real patient. A lubricated catheter can be inserted in the urethral orifice, passed through the urethra, and into the bladder. When the bladder is successfully entered, artificial urine (water) will flow from the catheter.

The student will feel the normal restrictions caused by the mucosal folds, bulbous urethra, and the internal urethral sphincter, just prior to entrance into the bladder. The experience teaches proper positioning and movement of the penis to allow the catheter to pass easily with a minimum of discomfort to the patient. Life/form® Male Catheterization Simulator includes a hard carrying case, lubricant, catheter, and teaching guide. Three-year warranty.

NOTE: A Foley catheter (#NUR-RP1127) can be used if extreme care is taken to inflate the cuff only when it is in the proper position. Just as in a real patient, the cuff must be completely deflated before the catheter is removed. Improper use of a Foley can result in damage to the simulator, just as when using a Foley catheter with a real patient.

#NUR855

#NUR985 Lubricant kit

#RP1127 Foley Catheter (1 each)

#RP1128 Foley Catheter (10 pk)

MALE & FEMALE CATHETER MODEL

Use these realistic catheterization models to practice the proper insertion of a lubricated catheter. May also be used for teaching anatomy and sterile cleansing techniques before, during, and after insertion. Anatomy on the male catheter includes rectum, seminal vesicle, bladder, pelvic bone, prostate, urethral sphincter muscle, urethral meatus, glans, scrotum, pelvic diaphragm, and anus. Anatomy on the female catheter includes rectum, uterus, bladder, pelvic bone, urethral sphincter muscle, clitoris, urethral meatus, labium minora, vagina, labium majora, pelvic diaphragm, and anus. Models use any catheter size 16 FR. or smaller. Each model includes instructions with anatomy diagram, plus a storage box and a three-year warranty.

#NUR1152

#NUR1150 (male catheter model)

#NUR1151 (female catheter model)

#RP1127 (Foley Catheter) 1 each

#RP1128 (Foley Catheter) 10 pk

MALE CATHETER MODEL TYPE 1

This life size model is designed for training in catheter insertion on adult males. Made of silicone and rubber, the skin is extremely realistic. Other features include:

- The side and back of the model, urethra, and bladder are all transparent, enhancing instruction by enabling full visibility of catheter insertion and the presence of the balloon inside the bladder.
- The model moves exactly like a real penis, so practice holding the penis stationary may be performed. In addition if the penis is not raised to the proper position, insertion can become more difficult. Includes storage case.

#LM-029

LIFE/form® ENEMA ADMINISTRATION SIMULATOR

You will appreciate the convenience of having a Life/form® simulator to teach enema procedures. Use it for group demonstrations and practice sessions of any size. Each student can realistically practice administering an enema using this lifelike model. The standard enema procedures can be performed using conventional enema apparatus - no special equipment is required. All aspects of the simulator are lifelike in every detail. The upper buttock is flexible so that the trainee must raise the buttock in order to locate and make insertion into the anus. The simulator is portable and easy to use. A drain tube is provided so that the fluid can be drained directly into a large container or sink, for continuous use. Includes a hard carrying case, enema administration set, teaching guide and a three-year warranty. Size: 18" x 18" x 12".

#NUR957

LIFE/form® TESTICULAR EXAM SIMULATOR

Self-examination of the testicles is just as important as self-examination of the female breasts for early detection of tumors. Providing exceptional realism, this simulator features soft, thin outer skin with delicate underlying structures and four embedded, simulated tumors. Ideal for teaching proper palpation techniques. Simulator comes with baby powder, laminated tumor location and simulator care card, Male Self-Exam brochure, storage box, and a three-year warranty.

#NUR1143

OSTOMY CARE MODEL

Made of lifelike synthetic tissue, this model feels like real flesh. May be washed with soap and water, taped, bandaged, or fitted with ostomy bags. All four stomas may be lubricated and dilated with an inserted finger. The 13" x 18" model is packed in its own carrying case.

#NUR2350

LIFE/form® PERITONEAL DIALYSIS SIMULATOR

Designed to introduce patients, students, and nurses to the essentials of CAPD procedures and care. The realistic Life/form® torso offers a lifelike method to demonstrate and practice peritoneal dialysis. Success with CAPD is dependent on the patient's following dialysis procedures with extreme care. This Life/form® simulator gives the patient an opportunity to gain the confidence necessary for prolonged success with CAPD. Life/form® Peritoneal Dialysis Simulator is complete with indwelling Tenckhoff catheter in a hard storage case and a three-year warranty. Dialysis materials not included.

#NUR1027

LIFE/form® OSTOMY CARE SIMULATOR

Designed to help introduce the essentials of ostomy care to patients and students, this unit is ideal for demonstration and practice for several procedures. The anatomy of both a colostomy and ileostomy are carefully reproduced to provide lifelike functions and appearance. Dilation of the stomas can be demonstrated and practiced, along with application of postoperative and permanent ostomy bags. The colostomy can actually be irrigated.

Syringes are included to pump materials through the unit to provide drainage and excretion at the ileostomy and colostomy. The syringes are inserted through ports in the back of the simulator. One pumps the ileostomy with clear water, or water tinted for exact realism, and the other syringe pumps synthetic stool to the colostomy. The consistency of the stool can be varied by using water to thin the material, and most of the stool can be salvaged and reused. A soft, pliable material is used for the stomas in order to achieve a most realistic tactile sensation.

The Life/form® Ostomy Care Simulator is complete with a hard carrying case, teaching guide, a supply of simulated stool and a three-year warranty. Size: 18" x 18" x 12".

SEYMOUR BUTTS II WOUND CARE MODEL

Redesigned and now made with a new flexible, lifelike material that permits the application and easy removal of dressings, without leaving an adhesive residue. Still the most comprehensive model of its kind, molded from a 74-year-old patient, looks and feels like the real thing. Displaying the following pressure ulcers* (NPUAP 2007 - National Pressure Ulcer Advisory Panel): Stage I, Stage II, Stage III with undermining, tunneling, subcutaneous fat and slough, deep Stage IV with exposed bones, undermining, tunneling, subcutaneous fat, eschar and slough. Also shown are a suspected DTI (Deep Tissue Injury), unstageable full eschar/slough wound, and a 5 1/2" dehisced wound. The Stage III and Stage IV are positioned so that a "bridging" dressing for use with a vacuum assisted closure and negative pressure wound therapy devices can be demonstrated and practiced. Wound assessment has become critical to the operation of health agencies, as inaccurate wound assessment can affect reimbursement, cause inaccurate reporting of patient outcomes and the appearance of potential adverse events. This model makes it possible to visualize and understand the differences in wounds. Once the different etiologies are understood, you can discuss and devise treatment plans that will deliver optimized patient care. Great care has been taken to color each wound just as you would see it on a patient. You are able to demonstrate and practice wound cleansing, classification, staging, and assessment, as well as the measurement of wound length, depth, undermining, and tunneling. The positioning of the wounds permits multiple dressings to be demonstrated at the same time.

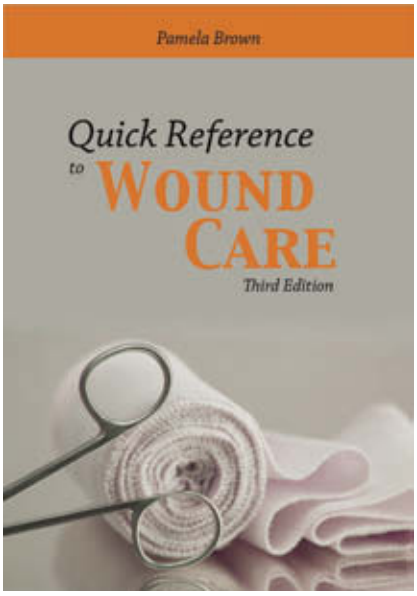
#VA910

#VA901 (carrying case)

BEDSORE CLEANSING & DRESSING MODEL

First, second, and third degree pressure sores are molded into this soft BIOLIKE™ buttock. Sores may be washed repeatedly, treated with antiseptics or any medication, dressed with gauze or gel dressings, and taped… just like real flesh. This model is a must for both professional and home care teaching. Complete with wood carrying case.

#NUR1494



QUICK REFERENCE TO WOUND CARE

Quick Reference to Wound Care, Third Edition provides healthcare professional with the information they need to provide optimal care to patients in the most cost-effective manner. This is a nuts-and-bolts resource that covers the basics of wound care from A to Z, illustrating the most common wound types with color photographs. There are numerous exhibits to aid clinicians in assessment, documentation, and day-to-day treatment of wounds.

This book provides step-by-step instructions for developing a care plan for patients with wounds; it addresses the normal healing process, basics of wound management, and topical treatments, as well as the major wound types that are most commonly seen by healthcare professionals and nurses in the home healthcare setting.

SIMON OR SUSIE: PATIENT CARE SIMULATORS

SUSIESIMON-O

SIMON-205

SUSIE-206

SIMPLE SIMON OR SIMPLE SUSIE

Simple Simon and Simple Susie offers training in a variety of clinical procedures to both nurses and other health care professionals. Features include:

- Full-size adult manikin
- Soft, lifelike face skin
- Stylish wig for haircare exercises and surgical draping (Susie only)
- Movable jaw with tongue
- Removable upper and lower dentures for oral hygiene
- Realistic eyes in eye sockets for ophthalmic exercises
- Ear canal for otic drops and irrigation
- 360° intramuscular injection site in left upper arm
- Intramuscular injection site in buttock
- Soft, realistic hands, feet, fingers, and toes
- Jointed elbows, wrists, knees, and ankles
- Bathing and bandaging activity
- Detachable at waist for storage
- Neck brace
- Available in light, medium, or dark skin tones

Includes instruction manual.

#SIMON-205
#SUSIE-206

SIMON OR SUSIE

Includes all of the features of Simple Simon and Simple Susie as well as: mouth, nose, and tracheotomy openings for naso-gastric lavage and gavage; and new modular tricuspid valve permits male and female catheterization with soft silicone catheters.

Includes instruction manual.

#SIMON

SUSIE SIMON

Includes all of the features of Simon and Susie with the following additional features: Interchangeable male organ and sculpted stomas of a transverse colostomy, ileostomy, and suprapubic stoma.

Includes instruction manual.

#SUSIESIMON-O

Geriatric Education for EMS

ADVANCED GERI OR KERI MANIKIN

Perfect for nurse training, this manikin has it all! All joints provide maximum lifelike range of motion not found in any other manikin. Life/form® simulations have been included to allow the practice of more than 35 patient care procedures.

Features include:

Urinary Catheterization - Female & Male (Uncircumcised)

- Enema Administration - Female
- Prostate Exam, Stage B - Male
- Pap Smears and Douching
- Ostomy Care - Ileostomy, Colostomy Lavage & Suctioning
- Placement of Nasogastric Tubes
- Oral & Nasal Lavage, Gavage, & Suctioning
- Tracheostomy Care - Lavage & Suctioning
- Gastrostomy Care, Lavage, and Gavage
- Intramuscular Injection Sites - Arms, Thigh, Buttock
- Denture Removal - Upper & Lower
- Oral Hygiene
- Eye Irrigation
- Bed Baths
- Finger & Toe Bandaging - Flexible & Individually Molded
- Hair Care - Washing, Combing
- Bandaging & Wound Dressing
- Clothing Changes
- Patient Positioning & Transfer Techniques
- Hearing Aid Removal & Insertion Techniques
- Right IV training arm
- Left Blood Pressure training arm

Manikin includes male & female genitalia, dentures, hearing aid, 12 cc syringe, REN cleaner, a wig, lubricant spray, fluid drainage basin, and a catheter bag. Three-year warranty.

#GERI4030

#KERI4022

LIFE/form® BASIC GERI MANIKIN

The Geri™ Nursing Skills Manikin is ideal for preparing students for working with real-life geriatric patients, since it features an elderly appearance with skin wrinkles and folds. No other manikin on the market is so realistic and true-to-life. When compared to similar manikins, it features the best and most lifelike range of motion; Geri™ moves like a person, allows realistic patient positioning, and features nonpinching joints. Life/form® simulations are added for realism. The overall appearance of the manikin is female, however, removal of the wig and attachment of the male genitals converts it for male catheterization and prostate examination simulations. Excellent for all levels of health care education… from nursing assistants to medical students. Ideal for all OBRA required training. For the economy-minded program that still wants the best! Urinary catheterization cannot be performed on the Basic Geri™. Basic cares can be simulated. Three-year warranty.

#GER404

LIFE/form® BASIC KERI MANIKIN

The KERi™ Nursing Skills Manikin is not age-specific. Life/form® molding and modeling techniques have given KERi™ an unusually realistic appearance as a woman, or as a man when the wig is removed. Unique visual features reinforce the importance of inspecting patients and noting changes in their appearance. All joints provide maximum lifelike range of motion not found in any other manikin. Life/form® simulations have been included in KERi™ to allow the practice of more than 35 patient care procedures. Perfect manikin for all OBRA required training. Urinary catheterization cannot be performed on the Basic KERi™. Three-year warranty.

#KER402

GERI OR KERI AUSCULTATION MANIKIN

For auscultation training, the instructor selects from a menu of heart and lung conditions by wireless remote control. The manikin presents itself as a real patient without visible auscultation sites. The student must palpate to identify correct auscultation locations, and will hear different heart and lung sounds as the SmartScope™ is moved to different locations on the manikin. A diagnosis of the condition selected by the instructor can be made by comparing the variations in sounds occurring at different sites - just like a real patient! Lung sounds can be detected at five anterior and 12 posterior locations and students can practice auscultation at six anterior heart sites. The remote control does not have to be pointed directly at the manikin or SmartScope™ to operate. One remote control will operate multiple sets of SmartScopes™ and manikins simultaneously. Great for group instruction. Listen to the sounds by using either the single- or dual-user headpieces on the SmartScope™ or connecting to an amplified speaker (not included).

Package includes manikin, one remote control with LCD display, and one SmartScope™ with single- and dual-user headpiece. Requires two "AA" and four "AA" batteries (included). Three-year warranty.

#GERI4003

#KERI4023

Features include:

Heart Conditions:

- Normal
- Aortic Regurgitation
- Mitral Stenosis
- Pulmonary Stenosis
- Holosystolic
- Mid Systolic
- S3 Gallup
- S4 Gallup
- Systolic Click
- Atrial Septal Defect
- PDA
- VSD

Lung Conditions:

- Normal
- Wheeze
- Mono Wheeze
- Fine Crackle
- Rhonchi
- Stridor
- Bronchial
- Coarse Crackle
- Cavernous
- Pulmonary Edema
- Friction Rub
- Pectoriloquy

3-YEAR WARRANTY

MIKE & MICHELLE
1 YEAR PEDIATRIC CARE SIMULATOR

The Mike and Michelle one year old is perfect for training in standard and advanced clinical procedures. Features include:

- Soft, childlike face skin
- Self-molded hair
- Eyes open and close in realistic eye sockets for ophthalmic procedures
- Fully articulating head and jaw with teeth and tongue
- NG and otic exercises
- Bends at waist as in human
- Jointed elbows, wrists, knees, and ankles
- Realistic hands, feet, fingers, and toes
- Soft upper body skin over hard upper body for realistic feel
- Detachable at waist for easy storage
- Bathing and bandaging activity
- Intramuscular injection sites in left deltoid and right upper thigh
- Interchangeable male organ
- Tracheotomy opening
- Male and female catheterization
- Removable internal tanks
- Enema administration
- Neck brace

Includes t-shirt, shorts, carrying bag, and instruction manual.

#Mike-110

HEART & LUNG SOUNDS UPDATE KIT

Update your manikin at your facility with this kit. Features include: a sensor is hidden beneath the skin of the torso; a virtual stethoscope with multiple heart and lung sounds; the ability to hear the sounds as the bell of the stethoscope is moved across the front and back of the torso; and an external speaker can be plugged into the stethoscope to the classroom can hear what the student is hearing. Includes a virtual stethoscope, external speaker, instruction manual, and carrying case.

#SOUND-110U (for MIKE-110)

#SOUND-150U (for MIKE-150)

MIKE & MICHELLE
5 YEAR PEDIATRIC CARE SIMULATOR

The Mike and Michelle five year old is a sophisticated pediatric simulator for training in standard and advanced clinical procedures. These PEDI simulators are now available with site specific heart and lung sounds.
Other features include:

- Soft, lifelike face skin
- Self-molded hair
- Eyes open and close in realistic eye sockets for ophthalmic procedures
- Fully articulating head and jaw with teeth and tongue
- NG and otic exercises
- Bends at waist as in human
- Jointed elbows, wrists, knees, and ankles
- Realistic hands, feet, fingers, and toes
- Soft upper body skin over hard upper body for realistic feel
- Detachable at waist for easy storage
- Bathing and bandaging activity
- Intramuscular injection sites in left deltoid and right upper thigh
- Interchangeable male organ
- Tracheotomy opening
- Male and female catheterization
- Removable internal tanks
- Enema administration
- Neck brace

Includes t-shirt, shorts, carrying bag, and instruction manual.

KOKEN BABY GIRL/BOY

With this realistic manikin you can practice bathing, overall observation and measurement, diaper changing, suction, umbilicus treatment, rectal thermometry, and simple infant exercises.

Characteristics:

- The baby manikins are produced with a special silicone rubber that gives it the look and feel of real skin.
- The skin is completely waterproof and will not deteriorate with repeated bathing.
- Anatomically accurate anterior and posterior fontanel, sutura coronalis, and sutura sagittalis.
- Head and ears are flexible.
- Anatomically correct oral and nasal passages.
- Arms and legs can be positioned as needed.
- The umbilical cord can be detached easily.
- Anatomically correct genitalia.

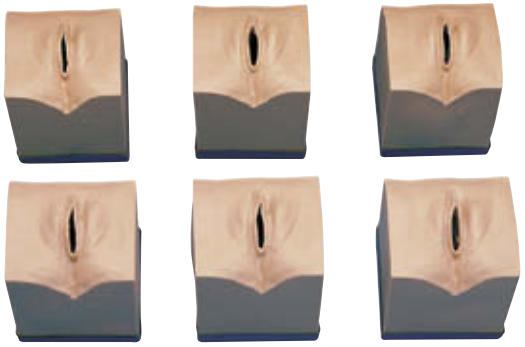
Training functions:

- Handling of urine-collecting pack.
- Bathing
- Overall observation and measurement of each part of the body.
- Breast feeding can be practiced on the baby girl.
- Use of diaper.
- Rectal thermometry.
- Realistic enema simulation.
- Pre and post evaluation of umbilical cord treatment.
- Suction of the nose, oral, cavity, and stomach.

The manikin includes a storage bag and one-year warranty.

#LM-026F

LM-026M



LIFE/form® CERVICAL DILATATION/EFFACEMENT SIMULATORS

The Life/form® Cervical Dilatation/Effacement Simulators are designed to facilitate the teaching, demonstration, and practice of cervical examination prior to birth. Every effort has been made to provide exceptional realism in these simulators so that the visual and tactile sensations experienced provide a positive transition to patient procedures.

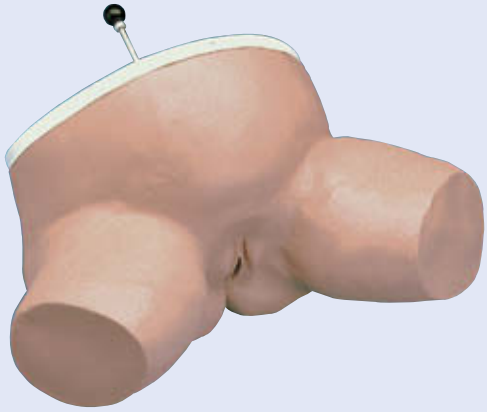
The complete simulator set consists of six separate 5" x 5" x 5" pelvic blocks. The external appearance of all six blocks is identical with the variations being in the internal structure. Internal texture, tissue density, and correct anatomical size are all carefully represented to provide the most realistic condition possible.

The simulators depict six different cervical conditions prior to birth. Each pelvic block is clearly identified on the bottom to indicate which condition exists internally. The different conditions depicted are: Stage 1 (no dilatation, no effacement), Stage 2 (2 cm dilatation, 50% effacement), Stage 3 (2 cm dilatation, full effacement), Stage 4 (5 cm dilatation, full effacement), Stage 5 (7 cm dilatation, full effacement), and Stage 6 (9 cm dilatation, full effacement).

With predetermined measurements of the internal cervical condition, all guesswork or estimating on the part of the student and instructor is eliminated.

Almost everyone's tactile understanding of 2 cm, 5 cm, 7 cm, and 9 cm dilatation and effacement conditions is identical, eliminating misconceptions and inaccurate patient condition evaluations.

#NUR1069



LIFE/form® BIRTHING STATION SIMULATOR

The Life/form® Birthing Station Simulator is designed to facilitate demonstration and practice of palpating the internal birthing canal. The simulator clearly shows the relationship between the fetal head and the ischial spines of the pelvic bone of the mother during the birth process. The realism of this Life/form® simulator will help students bridge the gap from classroom to bedside with ease and comfort.

The simulator is designed to highlight the ischial spines, which are of great obstetrical importance. The line drawn between the ischial spines typically represents the shortest diameter of the pelvic cavity. The ischial spines can be readily felt during a vaginal examination, and serve as valuable landmarks in ascertaining the level to which the presenting part of the fetus has descended into the pelvis.

The Birthing Station Simulator features a fetal head which will lock in any one of three lock stations. Minus Two Station shows the position of the fetal head when it lies above the ischial spines. Zero Station shows the fetal head directly between the ischial spines. Plus Three Station shows the fetal head below the ischial spines ready to enter into the birthing canal.

Life/form® Birthing Station Simulator includes teaching guide, a hard carrying case, and a three-year warranty. Size: 23" x 14" x 7".

#NUR1070

EMERGENCY CHILDBIRTH VIDEO

This exceptional video incorporating actual live childbirth footage, presents the essential procedures that must be followed to ensure the safety and well-being of the mother and the newborn. Knowing how to deliver a baby can turn an unpredictable and distressing childbirth situation into a controllable and positive experience.

READY OR NOT TOT®

The original manikin that simulates a baby's varying needs!

Take the glamour out of teen pregnancy and demonstrate the realities of the real world to your students.

Characteristics of Standard Ready-or-Not Tot®:

- Offers three different tending programs typical of most babies, to simulate normal baby-tending needs along with fussy periods in each program.
- Provides programmed tending events that are unpredictable to the student, but easy for the teacher to monitor, unlike other simulators.
- Cries, coos, and burps in response to appropriate care.
- Programs are 48 hours in length and run continuously.
- Includes a "demo" option.
- Demands student's attention for periods of 5 minutes to 30 minutes for each tending occurrence. There are 25-27 tending occurrences within each 48-hour time frame (for total of 7 hours of care).
- Provides a teacher with complete control of the child care experience.
- Includes a "panic" key for quieting difficulties without discontinuing the entire simulation.
- Alerts teacher to a student's abuse, panic, or tampering with the control box.
- Newborn-size doll represents a baby of a teen mom - 5 lbs. 8 oz., 20" long.
- Anatomically correct.

Comes complete with 1 set of student keys, 1 set of teacher keys, reproducible parental consent form/permission slip, reproducible student response sheet, teacher correction template, diaper, 9V battery, and instructions.

INFANT TRACHEOTOMY CARE MANIKIN

Ideal for teaching patients and caregivers the skills they will need to perform at home. Can be used to teach parents and caregivers basic tracheostomy care skills, and is used extensively with children to comfort them and improve their self-esteem. The Life/form® Tracheostomy Care simulator comes with one tracheostomy tube, instruction guide, and hard carrying case. Three-year warranty.

#NUR1167
#RP1171 (infant tracheostomy tube)

LIFE/form® SPECIAL NEEDS INFANT

Special needs infants require specific yet gentle care which includes the performance of vital medical procedures. This newborn-size infant allows health care facilities and medical staff to teach special procedures and develop a nursing care plan for special needs infants. The simulator was developed for a wide range of educational training, including beginning nursing students. Medical devices that can be used include: suction catheter, gastrostomy tube, nasogastric tube, and urethral catheter. Tracheostomy and gastrostomy tubes not included. Procedures that can be practiced include:

- Tracheostomy care (lavage and suctioning)
- Gastrostomy care (lavage and gavage)

#NUR1193 (light skin female)
#NUR1194 (light skin male)
#NUR1195 (dark skin female)
#NUR1196 (dark skin male)

LIFE/form® PATIENT EDUCATION TRACHEOSTOMY CARE SET

The Life/form® Patient Education Tracheostomy Care Set is ideal for teaching patients and caregivers the skills they will need to perform at home. The Adult Manikin includes oral and nasal passages, the pharynx, epiglottis, trachea, esophagus, tracheostomy site, and cricoid cartilage. The mouth and jaw are flexible to allow oral suctioning. The trachea branches into the left and right bronchial trees. Students can practice suctioning techniques, proper cuff inflation, dressing changes, and other techniques. Cleansing and maintenance of the external tracheal site can be performed just as on an actual patient. The Infant Manikin can be used to teach parents and caregivers basic tracheostomy care skills, and is used extensively with children to comfort them and improve their self-esteem.

The Life/form® Tracheostomy Care simulator set comes complete with one adult and one infant manikin, one adult and one infant tracheostomy tube, instruction guide, a hard carrying case, and a three-year warranty.

STANDBY SPHYGMOMANOMETER WITH 4 WHEEL BASE

The Baumanometer® Standby® Model is a precisely calibrated, clinical sphygmomanometer that functions on the immutable law of gravity. It is simple in design, convenient to use and is guaranteed to remain scientifically accurate. The Standby® Model has been providing accurate readings in hospitals, nursing homes, clinics and physicians' offices since its introduction in 1938.

The Standby® Model features a high contrast, polycarbonate scale, a Calibrated® V-Lok® Inflation System and a Mylar® Clad calibrated glass cartridge tube. The calibrated tube has several layers of extremely strong, crystal clear Mylar® film applied (using heat and pressure) to strengthen the tube and maintain its structural integrity even if the inner glass is broken.

A 300 mm Hg instrument for mobile use, the Standby® Model includes a Calibrated® V-Lok® Inflation System and 4 feet of Extendex® Tubing. The instrument body is diecast aluminum alloy and includes a convenient cuff storage compartment. The instrument is calibrated at a 20° angle. A cast iron mobile base is fitted with four 2 1/2" diameter electrically conductive rubber wheels. The standard cuff color is Medium Blue; the instrument color is Neutral Gray textured baked enamel.

MOBILE SPHYGMOMANOMETER

Features a two-piece height-adjustable stand that adjusts from 33" to 44", plus five easy-rolling casters for smooth transportation. Comes complete with our deluxe calibrated gray nylon cuff, deluxe air release valve, integrated cuff storage basket and 4' coiled tubing. Ten-year calibration warranty. Five-year neoprene inflation system warranty. Latex-free inflation system.

#NUR9031

COMBINATION MOBILE/ WALL MOUNTED SPHYGMOMANOMETER

This unit provides the option of either mounting the gauge on the wall or attaching it to a sturdy mobile stand. Includes all necessary assembly hardware, 8' coiled neoprene tubing, deluxe calibrated, nylon cuff and bulb with deluxe air release valve, five-caster dual wheel stand with height adjustable range of 43" - 55", a 7 lb. weight (black model only 09-169-021), and one mini screwdriver. Latex-free. Five-year neoprene inflation system warranty. Ten-year calibration warranty.

#NUR9021

ROLL-BY SPHYGMOMANOMETER WITH LARGE BASKET

The Roll-By™ is a 300 mmHg Aneroid instrument for mobile use. It's built to agree with our master instruments, which are traceable to the United States National Institute of Standards and Technology. It complies with ANSI/AAMI SP-9 for accuracy and performance (1% full scale ± 3 mmHg). The unique, low reflection, high contrast scale and red pointer increase visibility and reduce parallax error. They are manufactured with a precision low friction movement and twin pre-seasoned phosphor bronze diaphragm capsules.

Materials and Finish:

The manometer housing is neutral white ABS plastic and is mounted at a 20° angle for ease of viewing. The Baum Roll-By™ is 39 inches tall. Its packed weight is 16 1/2 lbs. The contoured handle and five point wheel base (20" dia.) are die-cast aluminum. Wheels are 2" (50 mm) hooded casters with mar-resistant polyurethane treads. The support pole and instrument mounting tube are heavy gauge, machined aluminum tubing. The large storage basket is nylon coated steel and aluminum. All metal parts are finished with neutral white baked enamel. The standard Adult Calibrated® V-Lok® Cuff is medium blue Dacron™ polyester.

Includes the Adult, 8 feet of Extendex® tubing, large integral storage basket, and die-cast aluminum wheel base and cast iron weight for increased stability. Latex-free.

OUR MISSION IS YOUR MISSION

WorldPoint is dedicated to serving the Training Network by providing exceptional customer service, the latest AHA materials, high quality manikins and training equipment – and watching for new, innovative products to offer our customers.

WORLDPOINT® AND START!

WorldPoint is now a **Start! Fit-Friendly Company / Platinum Level Award** recipient for 2009! We're extremely proud of this designation, and excited to be among the first in our industry to earn this achievement, and the first AHA partner to do so.

We earned this Award by starting **our own comprehensive wellness and walking program** for WorldPoint employees. Led by our company fitness coach Tina Midura, we now have on-site Pilates classes, two regular walking groups, volleyball, softball, and bowling teams, and a 'fresh fruit fridge.'

Led by **John Amato**, who is serving as Chairman of the Metro Chicago Board of Directors, WorldPoint has been an active participant and supporter of local **AHA/ Start!** events – and we're reaching out to our business neighbors and community to encourage them to take the first step and make their own commitment to a fit-friendly workplace.

WorldPoint is dedicated to serving you, the AHA Training Network, and getting behind the fight against heart disease and stroke in every way we can!

We have also made our own workplace a heart-healthy place, and this year, took a big step to formalize that commitment…

WorldPoint celebrates Start! Heartwalk

Getting our Happy Feet Show Clinic booth ready for the Heartwalk
